Under the terms of the GIA, Muskrat Falls is required to pay for all costs associated with the Labrador Transmission Assets. Under the terms of the PPA, Muskrat Falls will recover all costs associated with the Muskrat Falls hydroelectric facility as well as the costs incurred by Muskrat Falls under the GIA. 10. FINANCIAL INSTRUMENTS

10.1 Fair Value

The estimated fair values of financial instruments as at June 30, 2015 and December 31, 2014 are based on relevant market prices and information available at the time. Fair value estimates are based on valuation techniques which are significantly affected by the assumptions used including the amount and timing of future cash flows and discount rates reflecting various degrees of risk. As such, the fair value estimates below are not necessarily indicative of the amounts that Muskrat Falls might receive or incur in actual market transactions.

As a significant number of Muskrat Falls' assets and liabilities do not meet the definition of a financial instrument, the fair value estimates below do not reflect the fair value of Muskrat Falls as a whole.

Establishing Fair Value

Financial instruments recorded at fair value are classified using a fair value hierarchy that reflects the nature of the inputs used in making the measurements. The fair value hierarchy has the following levels:

Level 1 - valuation based on quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2 - valuation techniques based on inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3 - valuation techniques using inputs for the asset or liability that are not based on observable market data (unobservable inputs).

MUSKRAT FALLS CORPORATION
NOTES TO CONDENSED INTERIM FINANCIAL STATEMENTS (Unaudited)

The fair value hierarchy requires the use of observable market inputs whenever such inputs exist. A financial instrument is classified to the lowest level of the hierarchy for which a significant input has been considered in measuring fair value. For assets and liabilities that are recognized at fair value on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by reassessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period. There were no transfers between Level 1, 2 and 3 fair value measurement during the period ended June 30, 2015 and the year ended December 31, 2014.

As at June 30, 2015 and December 31, 2014, the Company did not have any level 3 instruments.

	Level	Carrying Value	Fair Value	Carrying Value	Fair Value
		June 30, 2015		December 31, 2014	
<i>(thousands of Canadian dollars)</i>					
Financial assets					
Restricted cash	1	672,101	672,101	537,949	537,949
Trade and other receivables	1	10,279	10,279	21,939	21,939
Investments	2	630,867	633,668	1,023,843	1,023,996
Advances	2	86,332	86,332	102,429	102,429
Financial liabilities					
Trade and other payables	1	291,143	291,143	229,783	229,783
Long-term debt	2	2,132,455	2,523,287	2,132,466	2,509,704

The fair value of restricted cash, trade and other receivables, advances and trade and other payables approximate their carrying values due to their short-term maturity.

11. RELATED PARTY TRANSACTIONS
