

Nalcor Energy releases its 2011 Environmental Performance Report

June 7, 2012, St. John's, NL - Nalcor Energy today released its 2011 Environmental Performance Report. The report provides an update on the company's environmental activities.

"Over the last few years, we've continued to improve our environmental performance, while maintaining the safe and reliable delivery of electricity and allows us to pursue growth opportunities," said Ed Martin, Nalcor Energy's President and CEO. "Our commitment to being an environmental leader helps ensure a healthy and sustainable environment for future generations of Newfoundlanders and Labradorians."

All Nalcor Energy operations maintain a high standard of environmental responsibility and performance through the implementation of a comprehensive Environmental Management System (EMS). Nalcor's EMS is ISO 14001 certified to drive the continual improvement of the company's environmental performance.

"Guiding principles outlined in our Environmental Policy set out Nalcor's environmental responsibilities, actions and decision-making," said Frank Ricketts, Nalcor Energy's Manager of Environmental Services. "The company is dedicated to environmentally-sound practices and good stewardship of our natural resources as well as environmental reporting."

A few of the key environmental highlights of 2011 include:

- Nalcor Energy and Ed Martin were named as one of "Canada's 2012 Clean50 and Clean16" in recognition of the company's environmental efforts.
- Churchill Falls completed 100% of Environmental Management System (EMS) targets and milestones.
- Continued development of an ISO 14001 compliant environmental management system at Menihek, Exploits Generation, Oil and Gas and Bull Arm Fabrication.
- Hydro, through the takeCHARGE program, continued to raise homeowner awareness of energy efficiency technologies and energy efficiency overall with the pilot of the Coupon Program and the second phase of the coastal Labrador Energy Efficiency Project in Mary's Harbour and Nain.

- Continued to implement a number of internal initiatives, such as the installation of a Waste Heat Recovery System in the Nain Diesel Plant, to make Nalcor's facilities more energy efficient.
