TWIN FALLS POWER CORPORATION LIMITED
NOTES TO CONDENSED INTERIM FINANCIAL STATEMENTS (Unaudited)

1. DESCRIPTION OF BUSINESS AND GOING CONCERN

Twin Falls Power Corporation Limited (Twin Falls) is incorporated under the laws of Canada and has developed a 225 megawatt (MW) hydroelectric generating plant on the Unknown River in Labrador. The plant has been inoperative since 1974. The plant is located on land that was sub-leased by Twin Falls from Churchill Falls (Labrador) Corporation Limited (Churchill Falls). That sub-lease expired on December 31, 2014 and ownership of the plant now resides with Churchill Falls. Twin Falls' head office is located at 500 Columbus Drive, St. John's, Newfoundland and Labrador, A1B 3T5, Canada.

These condensed interim financial statements have been prepared by Management in accordance with International Financial Reporting Standards (IFRS) applicable to a going concern, which assumes Twin Falls will be able to realize its assets and discharge its liabilities in the normal course of operations for the foreseeable future.

On December 31, 2014, the Sub-lease dated November 15, 1961 with Churchill Falls for the right to develop hydroelectric power on the Unknown River (the Sub-lease) expired. Twin Falls is a party to various agreements signed between Newfoundland and Labrador Hydro (Hydro), Churchill Falls and third parties utilizing assets in which Twin Falls has an ownership interest. As such, Management currently has not made the decision to formally cease operations. Any changes to Twin Falls operations impacting the values of these assets would be subject to Newfoundland and Labrador Board of Commissioners of Public Utilities (PUB) review and approval.

As at June 30, 2016, Twin Falls has sufficient funds to discharge all known and measurable liabilities. Accordingly, these financial statements do not include adjustments to the carrying values and classification of assets and liabilities that may be necessary should Twin Falls no longer be a going concern. These adjustments could be material.

2. SIGNIFICANT ACCOUNTING POLICIES

Statement of Compliance and Basis of Measurement

These condensed interim financial statements have been prepared in accordance with International Accounting Standards (IAS) 34 Interim Financial Reporting and have been prepared using accounting policies consistent with those used in the preparation of the annual audited financial statements for the year ended December 31, 2015.

These condensed interim financial statements do not include all of the disclosures normally found in Twin Falls' annual audited financial statements and should be read in conjunction with the annual audited financial statements.

These condensed interim financial statements have been prepared on a historical cost basis. The condensed interim financial statements are presented in Canadian dollars and all values rounded to the nearest thousand, except when otherwise noted. The condensed interim financial statements were approved by Twin Falls' Board of Directors (the Board) on August 9, 2016.

6. NET FINANCE (INCOME) EXPENSE

<i>For the period ended June 30 (thousands of Canadian dollars)</i>	Three months ended		Six months ended	
	2016	2015	2016	2015
Finance income				
Interest income on short-term investments	-	(14)	-	(30)
Other interest income	(8)	(1)	(18)	(2)
Net finance (income) expense	(8)	(15)	(18)	(32)

7. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

Fair Value

The estimated fair values of financial instruments as at June 30, 2016 and December 31, 2015 are based on relevant market prices and information available at the time. Fair value estimates are based on valuation techniques which are significantly affected by the assumptions used including the amount and timing of future cash flows and discount rates reflecting various degrees of risk. As such, the fair value estimates below are not necessarily indicative of the amounts that Twin Falls might receive or incur in actual market transactions.

As a significant number of Twin Falls' assets and liabilities do not meet the definition of a financial instrument, the fair value estimates below do not reflect the fair value of Twin Falls as a whole.

Establishing Fair Value

Financial instruments recorded at fair value are classified using a fair value hierarchy that reflects the nature of the inputs used in making the measurements. The fair value hierarchy has the following levels:

Level 1 - valuation based on quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2 - valuation techniques based on inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3 - valuation techniques using inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The fair value hierarchy requires the use of observable market inputs whenever such inputs exist. A financial instrument is classified to the lowest level of the hierarchy for which a significant input has been considered in measuring fair value. For assets and liabilities that are recognized at fair value on a recurring basis, Twin Falls determines whether transfers have occurred between levels in the hierarchy by reassessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period. There were no transfers between Level 1, 2 and 3 fair value measurement during the periods ended June 30, 2016 and December 31, 2015.

As at June 30, 2016 Twin Falls did not have any Level 3 instruments.

The fair value of cash and cash equivalents, trade and other receivables and trade and other payables approximate their carrying values due to their short-term maturity.

TWIN FALLS POWER CORPORATION LIMITED
NOTES TO CONDENSED INTERIM FINANCIAL STATEMENTS (Unaudited)

8. RELATED PARTY TRANSACTIONS

Twin Falls enters into various transactions with its shareholders and other affiliates. These transactions occur within the normal course of operations and are measured at the exchange amount, which is the amount of consideration agreed to by the related parties. Related parties with which Twin Falls transacts are as follows:

Related Party	Relationship
Churchill Falls	33.3% shareholder of Twin Falls
Iron Ore Company of Canada (IOC)	49.6% shareholder of Twin Falls
Wabush Resources Inc. (Wabush Mines)	12.5% shareholder of Twin Falls
Wabush Iron Co. Limited (Wabush Mines)	4.6% shareholder of Twin Falls
Hydro	65.8% shareholder of Churchill Falls
Nalcor Energy (Nalcor)	100.0% shareholder of Hydro

Routine operating transactions with related parties are settled at prevailing market prices under normal trade terms.

9. COMMITMENTS AND CONTINGENCIES

Due to the expiry of the Sub-lease, Twin Falls no longer has access to, or the ability to generate, hydroelectric power for sale. On December 22, 2014, a sub-lease agreement was signed between Hydro, Churchill Falls and Twin Falls, naming Hydro a lessee of the transmission lines and related assets from Labrador West to Churchill Falls. The original expiration date of this sub-lease was June 30, 2015 but it has been extended to December 31, 2016.

The results of an Environmental Site Assessment (ESA) conducted in 2002 at the Twin Falls Generating Station indicated higher than acceptable concentrations of contaminants in the soil and waters adjacent to the powerhouse. Further testing was conducted to determine the extent of contamination. The recommendations arising from this testing indicate that remediation is not required, but that further monitoring be carried out. Monitoring was performed in 2010 and again in 2013, with no remediation required. The 2013 sampling indicated that concentrations of total petroleum hydrocarbons (TPH) and Polychlorinated biphenyls (PCBs) in sediment and PCBs in fish have generally remained stable, or decreased, since 2010. Further sampling is recommended to be conducted in 2018 and it is recommended that fishing remain closed in Bonnell Creek.

The Twin Falls' Board of Directors is currently examining the extent, if any, of Twin Falls' responsibility for any environmental liabilities, or other obligations subsequent to 2014. The outcome is not determinable at this time.

10. SUPPLEMENTARY CASH FLOW INFORMATION

<i>For the period ended June 30 (thousands of Canadian dollars)</i>	Three months ended		Six months ended
