

## Public Open Houses/General Information Sessions

### Nalcor Energy - Lower Churchill Project

Nalcor Energy invites the public to attend Open Houses/Information Sessions on the Muskrat Falls Project. The Open Houses are part of Nalcor's continued efforts to consult with Newfoundlanders and Labradorians on the Project and follow Nalcor's submission of the Labrador-Island Transmission Link Environmental Impact Statement (EIS).

These Open Houses will provide the public with information on the transmission EIS, an overview of the Muskrat Falls Project, as well as and associated employment and business opportunities. Project team members will be available to answer questions and listen to feedback.
