

Nalcor Energy talks Muskrat Falls and transmission across the province

April 27, 2012 – Between April 30 and May 14, Nalcor Energy will hold public open houses in seven regions across Newfoundland and Labrador.

At each open house, Nalcor employees will provide information on the Muskrat Falls Project, recent Labrador-Island Transmission Link Environmental Impact Statement and associated employment and business opportunities. Nalcor staff will be available to answer questions and listen to feedback from the public.

These sessions follow more than 30 open houses that have been held across the province since 2010 and is part of Nalcor's commitment to share information with communities on the Muskrat Falls Project. Nalcor encourages the public to attend an open house in their area and share questions for discussion at open houses at facebook.com/NalcorEnergy or [@NalcorEnergy](https://twitter.com/NalcorEnergy) on twitter.

The first open house begins Monday, April 30 in Sandy Cove at the Sandy Cove Lions Club from 4 p.m. to 7 p.m. Additional open houses will be held in Forteau (May 1), CBS (May 3), Arnold's Cove (May 8), Grand Falls-Windsor (May 9), Deer Lake (May 10) and St. John's (May 14).

Visit Nalcor's website at www.nalcorenergy.com or contact 1.888.576.5454 or lowerchurchill@nalcorenergy.com for details on times and locations of each session.
