

Nalcor launches Lower Churchill Project Community Newsletter

June 29, 2011, St. John's, NL – This week, Labradorians will receive the first edition of Lower Churchill Project News from Nalcor Energy.

“Nalcor is committed to maintaining a positive dialogue with the communities and residents of Labrador and continuing to provide information on all aspects of the Project,” says Gilbert Bennett, Vice President, Lower Churchill Project. “Labradorians have told us they’d like more information and regular updates on the Project and this newsletter is one way of sharing information directly with people.”

The newsletter will be delivered four times a year to all residents and businesses in Labrador. An electronic version of the newsletter is available online at nalcorenergy.com.

“This community newsletter is one way of keeping people throughout all of Labrador informed,” explained Bennett. “We’ve also hosted public open houses, stakeholder meetings and attended various community events throughout the past year. We will continue to engage with residents, local business leaders and other community stakeholders as much as possible.”

For more information about the Lower Churchill Project, visit the Project office at 19-21 Burnwood Drive in Happy Valley-Goose Bay or online at nalcorenergy.com. For news and updates about Nalcor and the Lower Churchill Project, follow Nalcor at twitter.com/NalcorEnergy and facebook.com/NalcorEnergy.
