

NEWFOUNDLAND AND LABRADOR HYDRO
NON-CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2016

Independent Auditor's Report

To the Directors of Newfoundland and Labrador Hydro

We have audited the accompanying non-consolidated financial statements of Newfoundland and Labrador Hydro, which comprise the non-consolidated statement of financial position as at December 31, 2016, and the non-consolidated statements of profit and comprehensive income, changes in equity and cash flows for the year then ended, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Non-Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these non-consolidated financial statements in accordance with the financial reporting provisions of Section 59 of the Public Utilities Act, and for such internal control as management determines is necessary to enable the preparation of non-consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these non-consolidated financial statements based on our audit. We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the non-consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the non-consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the non-consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the non-consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the non-consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the non-consolidated financial statements present fairly, in all material respects, the financial position of Newfoundland and Labrador Hydro as at December 31, 2016, and its financial performance and its cash flows for the year ended December 31, 2016, in accordance with the financial reporting provisions of Section 59 of the Public Utilities Act.

Basis of Accounting and Restrictions on Distribution and Use

Without modifying our opinion, we draw attention to Note 2 to the non-consolidated financial statements, which describes the basis of accounting. The non-consolidated financial statements are prepared to assist Newfoundland and Labrador Hydro meet the requirements of the Newfoundland and Labrador Board of Commissioners of Public Utilities. As a result, the non-consolidated financial statements may not be suitable for another purpose. Our report is intended solely for Newfoundland and Labrador Hydro and the Newfoundland and Labrador Board of Commissioners of Public Utilities and should not be distributed to or used by parties other than Newfoundland and Labrador Hydro and the Newfoundland and Labrador Board of Commissioners of Public Utilities.

Other Matter

Newfoundland and Labrador Hydro has prepared separate consolidated financial statements for the year ended December 31, 2016 in accordance with International Financial Reporting Standards on which we issued an unmodified auditor's report to the Lieutenant-Governor in Council, Province of Newfoundland and Labrador dated March 7, 2017.

Emphasis of Matter

Without modifying our opinion, we draw attention to Note 31 to the financial statements, which explains that certain comparative information for the year ended December 31, 2015 has been restated.

NEWFOUNDLAND AND LABRADOR HYDRO

NOTES TO THE NON-CONSOLIDATED FINANCIAL STATEMENTS

1. DESCRIPTION OF BUSINESS

Newfoundland and Labrador Hydro (Hydro or the Company) is incorporated under a special act of the Legislature of the Province of Newfoundland and Labrador (the Province). The principal activity of Hydro is the generation, transmission and sale of electricity. Hydro's operations include both regulated and non-regulated activities. Hydro is a 100% owned subsidiary of Nalcor Energy (Nalcor). Hydro's head office is located at 500 Columbus Drive in St. John's, Newfoundland and Labrador, A1B 0C9, Canada.

Hydro holds interests in the following entities:

A 65.8% interest in Churchill Falls (Labrador) Corporation Limited (Churchill Falls). Churchill Falls is incorporated under the laws of Canada and owns and operates a hydroelectric generating plant and related transmission facilities situated in Labrador which has a rated capacity of 5,428 megawatts (MW).

A 51.0% interest in Lower Churchill Development Corporation (LCDC), an inactive subsidiary. LCDC is incorporated under the laws of Newfoundland and Labrador and was established with the objective of developing all or part of the hydroelectric potential of the Lower Churchill River.

2. SIGNIFICANT ACCOUNTING POLICIES

2.1 Statement of Compliance and Basis of Measurement

These annual audited non-consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB) with the exception of Hydro's investments in joint arrangements and related disclosures. These statements are non-consolidated as the investments in joint arrangements have been accounted for using the equity method of accounting, as described in Note 2.9. Consolidated statements for the same period have been prepared for presentation to the Lieutenant Governor in Council of the Province.

These annual audited non-consolidated financial statements have been prepared on a historical cost basis, except for financial instruments at fair value through profit or loss (FVTPL) and available-for-sale (AFS) financial assets which have been measured at fair value. The annual audited non-consolidated financial statements are presented in Canadian Dollars (CAD) and all values rounded to the nearest million, except when otherwise noted. The annual audited non-consolidated financial statements were approved by Hydro's Board of Directors (the Board) on March 6, 2017.

2.2 Cash and Cash Equivalents and Short-Term Investments

Cash and cash equivalents consist of amounts on deposit with a Schedule 1 Canadian Chartered Bank, as well as highly liquid investments with maturities of three months or less. Investments with maturities greater than three months and less than twelve months are classified as short-term investments. Cash and cash equivalents are measured at cost, which approximates fair value, while short-term investments are measured at fair value.

2.3 Trade and Other Receivables

Trade and other receivables are classified as loans and receivables and are measured at amortized cost using the effective interest method.

2.4 Inventories

Inventories are carried at the lower of cost and net realizable value. Cost is determined on a weighted average basis and includes expenditures incurred in acquiring the inventories and bringing them to their existing condition and location. Net realizable value represents the estimated selling price for inventories less all estimated costs of completion and costs necessary to make the sale.

NEWFOUNDLAND AND LABRADOR HYDRO

NOTES TO THE NON-CONSOLIDATED FINANCIAL STATEMENTS

2.5 Property, Plant and Equipment

Items of property, plant and equipment are recognized using the cost model and thus are recorded at cost less accumulated depreciation and accumulated impairment losses. Cost includes materials, labour, contracted services, professional fees and, for qualifying assets, borrowing costs capitalized in accordance with Hydro's accounting policy outlined in Note 2.7. Costs capitalized with the related asset include all those costs directly attributable to bringing the asset into operation. When significant parts of property, plant and equipment are required to be replaced at intervals, Hydro recognizes such parts as individual assets with specific useful lives and depreciation, respectively. Likewise, when a major inspection is performed, its cost is recognized in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repairs and maintenance costs are recognized in profit or loss as incurred. Property, plant and equipment is not revalued for financial reporting purposes. Depreciation of these assets commences when the assets are ready for their intended use.

Depreciation is calculated on a straight-line basis over the estimated useful lives of the assets as follows:

Generation plant	
Hydroelectric	45 to 100 years
Thermal	35 to 65 years
Diesel	25 to 55 years
Transmission	
Lines	30 to 65 years
Terminal stations	40 to 55 years
Distribution system	30 to 55 years
Other assets	5 to 55 years

Hydroelectric generation plant includes the powerhouse, turbines, governors and generators, as well as water conveying and control structures, including dams, dikes, tailrace, penstock and intake structures. Thermal generation plant is comprised of the powerhouse, turbines and generators, boilers, oil storage tanks, stacks, and auxiliary systems. Diesel generation plant includes the buildings, engines, generators, switchgear, fuel storage and transfer systems, dikes and liners and cooling systems.

Transmission lines include the support structures, foundations and insulators associated with lines at voltages of 230, 138 and 69 kilovolt (kV). Terminal station assets are used to step up voltages of electricity and to step down voltages for distribution. Distribution system assets include poles, transformers, insulators, and conductors.

Other assets include telecontrol, buildings, vehicles, furniture, tools and equipment.

2.6 Intangible Assets

Intangible assets that are expected to generate future economic benefit and are measurable, including computer software costs and studies are capitalized as intangible assets in accordance with IAS 38.

Intangible assets with finite useful lives are carried at cost less accumulated amortization and accumulated impairment losses. The estimated useful life and amortization method are reviewed periodically with the effect of any changes in estimate being accounted for on a prospective basis. Intangible assets with indefinite useful lives are carried at cost less accumulated impairment losses.

Amortization is calculated on a straight-line basis over the estimated useful lives of the assets as follows:

Feasibility studies	5 to 20 years
Computer software	10 years

NEWFOUNDLAND AND LABRADOR HYDRO
NOTES TO THE NON-CONSOLIDATED FINANCIAL STATEMENTS

2.7 Borrowing Costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalization. All other borrowing costs are recognized in the Non-Consolidated Statement of Profit and Comprehensive Income in the period in which they are incurred.

2.8 Impairment of Non-Financial Assets

At the end of each reporting period, Hydro reviews the carrying amounts of its non-financial assets, to determine whether there is any indication that those assets may be impaired. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss, if any.

Where it is not possible to estimate the recoverable amount of an individual asset, Hydro estimates the recoverable amount of the cash-generating unit (CGU) to which the asset belongs. Where a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual CGUs, or otherwise they are allocated to the smallest group of CGUs for which a reasonable and consistent allocation basis can be identified. The recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted. Value in use is generally computed by reference to the present value of future cash flows expected to be derived from non-financial assets.

If the recoverable amount of an asset or CGU is estimated to be less than its carrying amount, the carrying amount of the asset or CGU is reduced to its recoverable amount. An impairment loss is recognized immediately in the Non-Consolidated Statement of Profit and Comprehensive Income.

2.9 Investments in Joint Arrangements

A joint arrangement is an arrangement of which two or more parties have joint control. Control exists when an entity has the power, directly or indirectly, to govern the financial and operating policies of another entity, so as to obtain benefits from its activities. A joint arrangement is classified as either a joint operation or a joint venture based on the rights of the parties involved.

Effective June 18, 1999, Hydro, Churchill Falls and Hydro-Québec entered into a shareholders' agreement which provided, among other matters, that certain of the strategic operating, financing and investing policies of Churchill Falls be subject to approval jointly by representatives of Hydro and Hydro-Québec who are members on the Board of Directors of Churchill Falls. Although Hydro retains its 65.8% ownership interest, the agreement changed the nature of the relationship between Hydro and Hydro-Québec, with respect to Churchill Falls, from that of majority and minority shareholders, respectively, to that of joint operators. For the purposes of these non-consolidated financial statements, the investment is recorded using the equity method of accounting. Under the equity method, the interest in the investment is carried in the Statement of Financial Position at cost plus post acquisition changes in Hydro's share of net assets of the investment. The Non-Consolidated Statement of Profit and Comprehensive Income reflects the share of the profit or loss of the joint arrangement.

2.10 Employee Future Benefits

(i) Pension Plan

Employees participate in the Province's Public Service Pension Plan, a multi-employer defined benefit plan. Contributions by Hydro to this Plan are recognized as an expense when employees have rendered service entitling them to the contributions. Liabilities associated with this Plan are held with the Province.

NEWFOUNDLAND AND LABRADOR HYDRO
NOTES TO THE NON-CONSOLIDATED FINANCIAL STATEMENTS

(ii) Other Benefits

Hydro provides group life insurance and health care benefits on a cost-shared basis to retired employees, in addition to a severance payment upon retirement.

The cost of providing these benefits is determined using the projected unit credit method, with actuarial valuations being completed on an annual basis, based on service and Management's best estimate of salary escalation, retirement ages of employees and expected health care costs.

Actuarial gains and losses on Hydro's defined benefit obligation are recognized in reserves in the period in which they occur. Past service costs are recognized in operating costs as incurred. Pursuant to Order No. P.U. 36 (2015), Hydro recognizes the amortization of employee future benefit actuarial gains and losses in the Non-Consolidated Statement of Profit and Comprehensive Income as a regulatory adjustment.

The retirement benefit obligation recognized in the Non-Consolidated Statement of Financial Position represents the present value of the defined benefit obligation.

2.11 Provisions

A provision is a liability of uncertain timing or amount. A provision is recognized if Hydro has a present legal obligation or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation and the amount can be reliably estimated. Provisions are not recognized for future operating losses. The provision is measured at the present value of the best estimate of the expenditures expected to be required to settle the obligation using a discount rate that reflects the current market assessments of the time value of money and the risks specific to the obligation. Provisions are re-measured at each Non-Consolidated Statement of Financial Position date using the current discount rate.

2.12 Decommissioning, Restoration and Environmental Liabilities

Legal and constructive obligations associated with the retirement of property, plant and equipment are recorded as liabilities when those obligations are incurred and are measured as the present value of the expected costs to settle the liability, discounted at a rate specific to the liability. The liability is accreted up to the date the liability will be incurred with a corresponding charge to net finance (income) expense. The carrying amount of decommissioning, restoration and environmental liabilities is reviewed annually with changes in the estimates of timing or amount of cash flows added to or deducted from the cost of the related asset or expensed in the Non-Consolidated Statement of Profit and Comprehensive Income if the liability is short-term in nature.

2.13 Revenue Recognition

Revenue from the sale of energy is recognized when Hydro has transferred the significant risks and rewards of ownership to the buyer, recovery of the consideration is probable and the amount of revenue can be reliably measured. Sales within the Province are primarily at rates approved by the Newfoundland and Labrador Board of Commissioners of Public Utilities (PUB), whereas export sales and sales to certain major industrial customers are either at rates under the terms of the applicable contracts, or at market rates.

2.14 Leasing

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

Lessor accounting

Amounts due from lessees under finance leases are recognized as receivables at the amount of Hydro's net investment in the leases. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on Hydro's net investment outstanding in respect of the leases.

Rental income from operating leases is recognized on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognized on a straight-line basis over the lease term.

NEWFOUNDLAND AND LABRADOR HYDRO

NOTES TO THE NON-CONSOLIDATED FINANCIAL STATEMENTS

Lessee accounting

Assets held under finance leases are initially recognized as assets of Hydro at their fair value at the inception of the lease or, if lower, at the present value of the minimum lease payments. The corresponding liability to the lessor is included in the Non-Consolidated Statement of Financial Position as a finance lease obligation.

Lease payments are apportioned between finance expenses and reduction of the lease obligation so as to achieve a constant rate of interest on the remaining balance of the liability. Finance expenses are recognized immediately in profit or loss, unless they are directly attributable to qualifying assets, in which case they are capitalized in accordance with Hydro's general policy on borrowing costs (Note 2.7). Contingent rental costs are recognized as operating costs in the periods in which they are incurred.

Operating lease payments are recognized as an expense on a straight-line basis over the lease term, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed. Contingent rentals arising under operating leases are recognized as an expense in the period in which they are incurred.

In the event that lease incentives are received to enter into operating leases, such incentives are recognized as a liability. The aggregate benefit of incentives is recognized as a reduction of rental expense on a straight-line basis, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed.

2.15 Net Finance (Income) Expense

For all financial instruments measured at amortized cost and interest bearing financial assets classified as AFS, interest income or expense is recorded using the effective interest rate method.

2.16 Foreign Currencies

Transactions in currencies other than Hydro's functional currency (foreign currencies) are recognized using the exchange rate in effect at the date of transaction, approximated by the prior month end close rate. At the end of each reporting period, monetary items denominated in foreign currencies are translated at the rates of exchange in effect at the period end date. Foreign exchange gains and losses not included in regulatory deferrals are recorded in the Non-Consolidated Statement of Profit and Comprehensive Income as other (income) expense.

2.17 Income Taxes

Hydro is exempt from paying income taxes under Section 149(1) (d.2) of the Income Tax Act.

2.18 Financial Instruments

Financial assets and financial liabilities are recognized in the Non-Consolidated Statement of Financial Position when Hydro becomes a party to the contractual provisions of the instrument and are initially measured at fair value. Subsequent measurement is based on classification. Financial instruments are classified into the following specified categories: financial assets at FVTPL, AFS financial assets, loans and receivables, held-to-maturity investments, financial liabilities at FVTPL, financial instruments used for hedging and other financial liabilities. The classification depends on the nature and purpose of the financial instruments and is determined at the time of initial recognition.

NEWFOUNDLAND AND LABRADOR HYDRO
NOTES TO THE NON-CONSOLIDATED FINANCIAL STATEMENTS

Classification of Financial Instruments

Hydro has classified each of its financial instruments into the following categories: financial assets at FVTPL, loans and receivables, held-to-maturity investments, AFS financial assets, financial liabilities at FVTPL, financial instruments used for hedging and other financial liabilities.

<u>Financial Instrument</u>	<u>Category</u>
Cash and cash equivalents	Loans and receivables
Trade and other receivables	Loans and receivables
Derivative instruments	At FVTPL and financial instruments used for hedging
Sinking funds – investments in same Hydro issue	Held-to-maturity investments
Sinking funds – other investments	AFS financial assets
Long-term receivables	Loans and receivables
Trade and other payables	Other financial liabilities
Short-term borrowings	Other financial liabilities
Long-term debt	Other financial liabilities

(i) Effective Interest Method

The effective interest method is a method of calculating the amortized cost of a financial instrument and allocating interest income or expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts or payments (including all fees on points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial instrument, or, where appropriate, a shorter period to the net carrying amount on initial recognition.

Income or expense is recognized on an effective interest basis for financial instruments other than those financial assets and liabilities classified as at FVTPL.

Financial Assets

(ii) Financial Assets at FVTPL

Financial assets are classified at FVTPL when the financial asset is either held for trading or it is designated as at FVTPL.

A financial asset is classified as held for trading if:

- it has been acquired principally for the purpose of selling it in the near term; or
- on initial recognition it is part of a portfolio of identified financial instruments that Hydro manages together and has a recent actual pattern of short-term profit-taking; or
- it is a derivative that is not designated and effective as a hedging instrument.

A financial asset other than a financial asset held for trading may be designated as at FVTPL upon initial recognition if:

- such designation eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise; or
- the financial asset forms part of a group of financial assets or financial liabilities or both, which is managed and its performance is evaluated on a fair value basis, in accordance with Hydro's documented risk management or investment strategy, and information about the grouping is provided internally on that basis; or
- it forms part of a contract containing one or more embedded derivatives, and IAS 39 Financial Instruments: Recognition and Measurement permits the entire combined contract (asset or liability) to be designated as at FVTPL.

Financial assets at FVTPL are stated at fair value, with any gains or losses arising on re-measurement recognized in other (income) expense. The net gain or loss incorporates any dividends or interest earned.

NEWFOUNDLAND AND LABRADOR HYDRO
NOTES TO THE NON-CONSOLIDATED FINANCIAL STATEMENTS

(iii) Loans and Receivables

Trade receivables, loans and other receivables with fixed or determinable payments that are not quoted in an active market are classified as loans and receivables. Loans and receivables are measured at amortized cost using the effective interest method, less any impairment. Interest income is recognized by applying the effective interest rate, except for short-term receivables when the recognition of interest would be immaterial.

(iv) Held-to-Maturity Investments

Non-derivative financial assets with fixed or determinable payments and fixed maturity dates that Hydro has the positive intent and ability to hold to maturity are classified as held-to-maturity investments. Held-to-maturity investments are measured at amortized cost using the effective interest method less any impairment, with revenue recognized on an effective yield basis.

(v) AFS Financial Assets

AFS financial assets are non-derivative financial assets that are designated as available-for-sale or are not classified in any of the previous categories. Gains and losses arising from changes in fair value are recognized in other comprehensive income and accumulated in the fair value reserve with the exception of impairment losses, interest calculated using the effective interest method, and foreign exchange gains and losses on monetary assets, which are recognized in profit or loss. Where the investment is disposed of or is determined to be impaired, the cumulative gain or loss previously accumulated in the fair value reserve is reclassified to profit or loss.

Financial Liabilities and Equity Instruments

(vi) Financial Liabilities at FVTPL

A financial liability may be classified as at FVTPL if the contracted liability contains one or more embedded derivatives, and if the embedded derivative significantly modified the cash flows or if the embedded derivative is not closely related to the host liability. Financial liabilities at FVTPL are stated at fair value, with any gains or losses arising from re-measurement recognized in profit or loss.

(vii) Other Financial Liabilities

Other financial liabilities, including borrowings, are initially measured at fair value, net of transaction costs. Other financial liabilities are subsequently measured at amortized cost using the effective interest method, with interest expense recognized on an effective yield basis.

(viii) Derivative Instruments and Financial Instruments Used for Hedging

Derivative instruments are utilized by Hydro to manage market risk. Hydro's policy is not to utilize derivative instruments for speculative purposes. Derivatives are initially measured at fair value at the date the derivative contracts are entered into and are subsequently measured at their fair value at the end of each reporting period. The resulting gain or loss is recognized in profit or loss immediately unless the derivative is designated and effective as a hedging relationship.

2.19 Derecognition of Financial Instruments

Hydro derecognizes a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If Hydro neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, its retained interest in the asset and any associated liability for amounts it may have to pay is recognized. If Hydro retains substantially all the risks and rewards of ownership of a transferred financial asset, it continues to recognize the financial asset and also recognizes the collateralized borrowing for the proceeds received. Hydro derecognizes financial liabilities when, and only when, its obligations are discharged, cancelled or they expire.

2.20 Impairment of Financial Assets

Financial assets are assessed for indicators of impairment at the end of each reporting period. Financial assets are

NEWFOUNDLAND AND LABRADOR HYDRO

NOTES TO THE NON-CONSOLIDATED FINANCIAL STATEMENTS

impaired where there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial asset, the estimated future cash flows of the investment have been affected.

Evidence of impairment could include:

- significant financial difficulty of the issuer or counterparty; or
- default or delinquency in interest or principal payments; or
- the borrower, more probable than not, entering into bankruptcy or financial re-organization.

For certain categories of financial assets, such as trade receivables, assets that are assessed not to be impaired individually are, in addition, assessed for impairment on a collective basis. Objective evidence of impairment for a portfolio of receivables could include Hydro's past experience of collecting payments, an increase in the number of delayed payments in the portfolio past the average credit period, as well as observable changes in national or local economic conditions that correlate with defaults on receivables.

For financial assets carried at amortized cost, the amount of the impairment is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the financial asset's original effective interest rate.

The carrying amount of the financial asset is reduced by the impairment loss directly for all financial assets with the exception of trade receivables, where the carrying amount is reduced through the use of an allowance account. When a trade receivable is considered uncollectible, it is written off against the allowance account. Subsequent recoveries of amounts previously written off are credited to the allowance account. Changes in the carrying amount of the allowance account are recognized in profit or loss.

When an AFS financial asset is considered to be impaired, cumulative gains or losses previously recognized in other comprehensive income are reclassified to profit or loss in the period.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed through profit or loss to the extent that the carrying amount of the investment at the date the impairment is reversed does not exceed what the amortized cost would have been had the impairment not been recognized.

2.21 Government Grants

Government grants are recognized when there is reasonable assurance that Hydro will comply with the associated conditions and that the grants will be received.

Government grants are recognized in profit or loss on a systematic basis over the periods in which Hydro recognizes as expenses the related costs for which the grants are intended to compensate. Specifically, government grants whose primary condition is that Hydro should purchase, construct or otherwise acquire non-current assets are recognized as deferred revenue in the Non-Consolidated Statement of Financial Position and transferred to the Non-Consolidated Statement of Profit and Comprehensive Income on a systematic and rational basis over the useful lives of the related assets.

Government grants that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to Hydro with no future related costs are recognized in the Non-Consolidated Statement of Profit and Comprehensive Income in the period in which they become receivable.

2.22 Regulatory Deferrals

Hydro's revenues from its electrical sales to most customers within the Province are subject to rate regulation by the PUB. Hydro's borrowing and capital expenditure programs are also subject to review and approval by the PUB. Rates are set through periodic general rate applications utilizing a cost of service (COS) methodology. The preliminary estimate of Hydro's allowed rate of return based upon Board Order No. P.U. 49 (2016) is 6.6% in 2016 and 6.7% in 2015 +/- 20 basis points. Hydro applies various accounting policies that differ from enterprises that do not operate in

NEWFOUNDLAND AND LABRADOR HYDRO

NOTES TO THE NON-CONSOLIDATED FINANCIAL STATEMENTS

a rate regulated environment. Generally, these policies result in the deferral and amortization of costs or credits which are expected to be recovered or refunded in future rates. In the absence of rate regulation, these amounts would be included in the determination of profit or loss in the year the amounts are incurred. The effects of rate regulation on the annual audited non-consolidated financial statements are disclosed in Note 11.

3. SIGNIFICANT ACCOUNTING JUDGMENTS, ESTIMATES AND ASSUMPTIONS

The preparation of the annual audited non-consolidated financial statements in conformity with IFRS requires Management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, revenues and expenses. Actual results may differ materially from these estimates, including changes as a result of future decisions made by the PUB. The estimates and underlying assumptions are reviewed on an on-going basis. Revisions to accounting estimates are recognized in the period in which the estimate is reviewed if the revision affects only that period or future periods.

3.1 Use of Judgments

(i) Property, Plant and Equipment

Hydro's accounting policy relating to property, plant and equipment is described in Note 2.5. In applying this policy, judgment is used in determining whether certain costs are additions to the carrying amount of the property, plant and equipment as opposed to repairs and maintenance. If an asset has been developed, judgment is required to identify the point at which the asset is capable of being used as intended and to identify the directly attributable borrowing costs to be included in the carrying value of the development asset. Judgment is also used in determining the appropriate componentization structure for Hydro's property, plant and equipment.

(ii) Revenue

Management exercises judgment in estimating the value of electricity consumed by retail customers in the period, but billed subsequent to the end of the reporting period. Specifically, this involves an estimate of consumption for each retail customer, based on the customer's past consumption history.

When recognizing deferrals and related amortization of costs or credits in Hydro Regulated, Management assumes that such costs or credits will be recovered or refunded through customer rates in future years. Recovery of some of these deferrals is subject to a future PUB order. As such, there is a risk that some or all of the regulatory deferrals will not be approved by the PUB which could have a material impact on Hydro Regulated's profit or loss in the year the order is received.

(iii) Determination of CGUs

Hydro's accounting policy relating to impairment of non-financial assets is described in Note 2.8. In applying this policy, Hydro groups assets into the smallest identifiable group for which cash flows are largely independent of the cash flows from other assets or groups of assets. Judgment is used in determining the level at which cash flows are largely independent of other assets or groups of assets.

(iv) Discount Rates

Certain of Hydro's financial liabilities are discounted using discount rates that are subject to Management's judgment.

3.2 Use of Estimates

(i) Property, Plant and Equipment

Amounts recorded for depreciation are based on the useful lives of Hydro's assets. The useful lives of property, plant and equipment are determined by independent specialists and reviewed annually by Hydro. These useful lives are Management's best estimate of the service lives of these assets. Changes to these lives could materially

NEWFOUNDLAND AND LABRADOR HYDRO
NOTES TO THE NON-CONSOLIDATED FINANCIAL STATEMENTS

affect the amount of depreciation recorded.

(ii) Intangible Assets

Amounts recorded for amortization are based on the useful lives of Hydro's assets. These useful lives are Management's best estimate of the service lives of these assets. Changes to these lives could materially affect the amount of amortization recorded.

(iii) Decommissioning Liabilities

Hydro recognizes a liability for the fair value of the future expenditures required to settle obligations associated with the retirement of property, plant and equipment. Decommissioning liabilities are recorded as a liability at fair value, with a corresponding increase to property, plant and equipment. Accretion of decommissioning liabilities is included in the Non-Consolidated Statement of Profit and Comprehensive Income through net finance (income) expense. Differences between the recorded decommissioning liabilities and the actual decommissioning costs incurred are recorded as a gain or loss in the settlement period.

(iv) Employee Benefits

Hydro provides group life insurance and health care benefits on a cost-shared basis to retired employees, in addition to a severance payment upon retirement. The expected cost of providing these other employee benefits is accounted for on an accrual basis, and has been actuarially determined using the projected unit credit method prorated on service, and Management's best estimate of salary escalation, retirement ages of employees and expected health care costs.

3.3 Use of Assumptions

Deferred Assets and Derivative Liabilities

Effective October 1, 2015, Hydro entered into a power purchase agreement (PPA) with Nalcor Energy Marketing Corporation (Energy Marketing) which allows for the purchase of available recapture energy from Hydro for resale by Energy Marketing in export markets or through agreements with counterparties. Additionally, the PPA allows for the use of Hydro's transmission service rights by Energy Marketing to deliver electricity, through rights which are provided to Hydro pursuant to a Transmission Service Agreement with Hydro-Québec dated April 1, 2009. In September 2016, the terms of the PPA were amended to require a 60 day termination notice by either party. This replaced the previous termination clause of 90 days prior the end of the operating year. Management's assumption is that the term of the PPA at December 31, 2016, will continue for at least the next 12 months.

Fair values relating to Hydro's financial instruments and derivatives that have been classified as Level 3, have been determined using inputs for the assets or liabilities that are not readily observable.

Hydro's PPA with Energy Marketing is accounted for as a derivative instrument, where Hydro determines that the fair value at initial recognition differs from the transaction price and the fair value is evidenced neither by a quoted price in an active market for an identical asset or liability nor based on a valuation technique that uses only data from observable markets. These derivative transactions are initially measured at fair value and the expected difference is deferred. Subsequently, the deferred difference is recognized in the Non-Consolidated Statement of Profit and Comprehensive Income on an appropriate basis over the life of the related derivative instrument but not later than when the valuation is wholly supported by observable market data or the transaction has occurred.

Hydro has elected to defer the difference between the fair value of the power purchase derivative liability upon initial recognition and the transaction price of the power purchase derivative liability and to amortize the deferred asset on a straight-line basis over its effective term (Note 8). These methods, when compared with alternatives, were determined by Management to more accurately reflect the nature and substance of the transactions.

4. FUTURE CHANGES IN ACCOUNTING POLICIES

Amendments to IFRS 11 – Accounting for Acquisition of Interests in Joint Operations, IAS 1 – Disclosure Initiatives and IAS 16 and 38 – Clarification of Acceptable Methods of Depreciation and Amortization that became effective for annual periods beginning on or after January 1, 2016 did not have a material impact on Hydro’s annual audited non-consolidated financial statements.

Hydro has not applied the following new and revised IFRS that have been issued but are not yet effective:

Amendments to IAS 7 – Disclosure Initiative¹

Amendments to IFRS 10 and IAS 28 – Sale or Contribution of Assets between an Investor and its Associate or Joint Venture⁴

IFRS 9 – Financial Instruments²

IFRS 15 – Revenue from Contracts with Customers²

IFRS 16 – Leases³

¹Effective for annual periods beginning on or after January 1, 2017, with earlier application permitted.

²Effective for annual periods beginning on or after January 1, 2018, with earlier application permitted.

³Effective for annual periods beginning on or after January 1, 2019, with earlier application permitted.

⁴Effective for annual periods beginning on or after a date yet to be determined.

4.1 Amendments to IAS 7 - Disclosure Initiative

The amendments require an entity to provide disclosures that enable users of financial statements to evaluate changes in liabilities arising from financing activities, including both changes arising from cash flows and non-cash changes. The amendments do not prescribe a specific format to disclose financing activities; however, an entity may fulfil the disclosure objective by providing a reconciliation between the opening and closing balances in the Statement of Financial Position for liabilities arising from financing activities.

The amendments apply prospectively. Entities are not required to present comparative information for earlier periods.

Management does not anticipate that the application of these amendments to IAS 7 will have a material impact on Hydro’s annual audited non-consolidated financial statement disclosures.

4.2 Amendments to IFRS 10 and IAS 28 - Sale or Contribution of Assets between an Investor and its Associated or Joint Venture

The amendments deal with situations where there is a sale or contribution of assets between an investor and its associate or joint venture.

In December 2015, the IASB postponed the effective date of this amendment indefinitely pending the outcome of its research project on the equity method of accounting. Earlier application of these amendments is still permitted.

4.3 IFRS 9 - Financial Instruments

In July 2014, the IASB finalized the reform of financial instruments accounting and issued IFRS 9 (as revised in 2014), which contains the requirements for a) the classification and measurement of financial assets and financial liabilities, b) impairment methodology, and c) general hedge accounting. IFRS 9 (as revised in 2014) will supersede IAS 39 Financial Instruments: Recognition and Measurement upon its effective date.

Phase 1: Classification and measurement of financial assets and financial liabilities

With respect to the classification and measurement, the number of categories of financial assets under IFRS 9 has been reduced; all recognized financial assets that are currently within the scope of IAS 39 will be subsequently measured at either amortized cost or fair value under IFRS 9.

NEWFOUNDLAND AND LABRADOR HYDRO

NOTES TO THE NON-CONSOLIDATED FINANCIAL STATEMENTS

IFRS 9 also contains requirements for the classification and measurement of financial liabilities and derecognition requirements. One major change from IAS 39 relates to the presentation of changes in the fair value of a financial liability designated as at FVTPL attributable to changes in the credit risk of that liability. Under IFRS 9, such changes are presented in other comprehensive income, unless the presentation of the effect of the change in the liability's credit risk in other comprehensive income would create or enlarge an accounting mismatch in profit or loss.

Phase 2: Impairment of financial assets

The impairment model under IFRS 9 reflects expected credit losses, as opposed to incurred credit losses under IAS 39. Under the impairment approach in IFRS 9, it is no longer necessary for a credit event to have occurred before credit losses are recognized. Instead, an entity always accounts for expected credit losses and changes in those expected credit losses. The amount of expected credit losses should be updated at each reporting date to reflect changes in credit risk since initial recognition.

Phase 3: Hedge accounting

The general hedge accounting requirements of IFRS 9 retain the three types of hedge accounting mechanisms in IAS 39. However, greater flexibility has been introduced to the types of transactions eligible for hedge accounting, specifically broadening the types of instruments that qualify as hedging instruments and the types of risk components of non-financial items that are eligible for hedge accounting. In addition, the effectiveness test has been overhauled and replaced with the principle of an 'economic relationship'. Retrospective assessment of hedge effectiveness is no longer required. Far more disclosure requirements about an entity's risk management activities have been introduced.

Transitional provisions

IFRS 9 (as revised in 2014) is effective for annual periods beginning on or after January 1, 2018 with earlier application permitted. Management has elected to adopt the standard as of the effective date, and although the classifications of existing financial instruments and related disclosures will change, Management does not anticipate material adjustments to Hydro's annual audited non-consolidated financial statements upon transition.

4.4 IFRS 15 - Revenue from Contracts with Customers

IFRS 15 establishes a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers. It will supersede the following revenue standards and interpretations upon its effective date:

- IAS 18 Revenue;
- IAS 11 Construction Contracts;
- IFRIC 13 Customer Loyalty Programs;
- IFRIC 15 Agreements for the Construction of Real Estate;
- IFRIC 18 Transfers of Assets from Customers; and
- SIC 31 Revenue-Barter Transactions Involving Advertising Services.

As suggested by the title of the new revenue standard, IFRS 15 will only cover revenue arising from contracts with customers. Under IFRS 15, a customer of an entity is a party that has contracted with the entity to obtain goods or services that are an output of the entity's ordinary activities in exchange for consideration. Unlike the scope of IAS 18, the recognition and measurement of interest income and dividend income from debt and equity investments are no longer within the scope of IFRS 15. Instead, they are within the scope of IAS 39 (or IFRS 9 if it is early adopted).

As mentioned above, the new standard has a single model to deal with revenue from contracts with customers. Its core principle is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services.

Specifically, the Standard introduces a five-step approach to revenue recognition:

- Step 1: Identify the contract(s) with a customer.
- Step 2: Identify the performance obligations in the contract.
- Step 3: Determine the transaction price.

NEWFOUNDLAND AND LABRADOR HYDRO
NOTES TO THE NON-CONSOLIDATED FINANCIAL STATEMENTS

Step 4: Allocate the transaction price to the performance obligations in the contract.
 Step 5: Recognize revenue when (or as) the entity satisfies a performance obligation.

Extensive disclosures are also required by the new standard.

Management anticipates that the application of IFRS 15 in the future may have a material impact on the amounts reported and disclosures made in Hydro's annual audited non-consolidated financial statements. However, it is not practicable to provide a reasonable estimate of the effect of IFRS 15 until Management performs a detailed review.

4.5 IFRS 16 - Leases

IFRS 16 provides a comprehensive model for the identification of lease arrangements and their treatment in the financial statements of both lessees and lessors. It will supersede the following lease standard and interpretations upon its effective date:

- IAS 17 Leases;
- IFRIC 4 Determining Whether an Arrangement contains a Lease;
- SIC-15 Operating Leases – Incentives; and
- SIC-27 Evaluating the Substance of Transactions Involving the Legal Form of a Lease.

IFRS 16 applies a control model to the identification of leases, distinguishing between leases and service contracts on the basis of whether there is an identified asset controlled by the customer.

The standard introduces significant changes to lessee accounting: it removes the distinction between operating and finance leases under IAS 17 and requires a lessee to recognize a right-of-use asset and a lease liability at lease commencement for all leases, except for short-term leases and leases of low value assets.

In contrast to lessee accounting, the IFRS 16 lessor accounting requirements remain largely unchanged from IAS 17, which continue to require a lessor to classify a lease as either an operating lease or a finance lease.

A lessee can apply IFRS 16 either by a full retrospective approach or a modified retrospective approach. If the latter approach is selected, an entity is not required to restate the comparative information and the cumulative effect of initially applying IFRS 16 must be presented as an adjustment to opening retained earnings. Management anticipates that the application of IFRS 16 in the future may have a material impact on the amounts reported and disclosures made in Hydro's annual audited non-consolidated financial statements. However, it is not practicable to provide a reasonable estimate of the effect of IFRS 16 until Management performs a detailed review.

5. CASH AND CASH EQUIVALENTS

As at December 31, 2016 and 2015, cash and cash equivalents consist entirely of cash.

6. TRADE AND OTHER RECEIVABLES

<i>As at December 31 (millions of Canadian dollars)</i>	2016	2015
Trade receivables	95.8	97.2
Other receivables	23.5	5.6
Due from related parties	5.5	6.2
Allowance for doubtful accounts	(16.3)	(12.6)
	108.5	96.4
<hr/>		
<i>As at December 31 (millions of Canadian dollars)</i>	2016	2015
0-60 days	104.8	93.5
60+ days	3.7	2.9
	108.5	96.4

NEWFOUNDLAND AND LABRADOR HYDRO
NOTES TO THE NON-CONSOLIDATED FINANCIAL STATEMENTS

<i>As at December 31 (millions of Canadian dollars)</i>	2016	2015
Allowance for doubtful accounts, beginning of year	(12.6)	(11.2)
Amounts provided for during the year	(3.8)	(1.5)
Amounts written off as uncollectable	0.1	0.1
Allowance for doubtful accounts, end of year	(16.3)	(12.6)

7. INVENTORIES

<i>As at December 31 (millions of Canadian dollars)</i>	2016	2015
No. 6 fuel	34.9	26.4
Material and other	32.6	30.6
Diesel fuel	3.8	4.2
Other fuel	4.4	3.9
Construction aggregates	0.5	0.5
	76.2	65.6

The cost of inventories recognized as an expense during the year is \$171.9 million (2015 - \$197.5 million) and is included in operating costs and fuels.

8. DEFERRED ASSET

The deferred asset represents Hydro's asset related to the power purchase agreement (PPA) with Energy Marketing. The deferred asset is amortized on a straight-line basis over the effective term, being one calendar year, of the related derivative liability. The aggregate difference yet to be recognized in profit or loss at the beginning and end of the year and a reconciliation of the changes of the balance during the year are as follows:

<i>As at December 31 (millions of Canadian dollars)</i>	2016	2015
Deferred asset, beginning of year	61.2	-
Additions	51.1	74.9
Amortization	(61.2)	(13.7)
Deferred asset, end of year	51.1	61.2

2014 cost deferral	8.0	7.3
2015 cost deferral	1.6	(27.8)
2016 cost deferral	(32.4)	-
Amortization of deferred foreign exchange losses	2.2	2.2
Asset disposal	(0.4)	-
Deferred energy conservation	(1.1)	-
Deferred foreign exchange on fuel	0.9	(0.4)
Deferred lease costs	0.6	(1.4)
Deferred purchased power savings	-	(0.1)
Employee future benefits actuarial loss	0.2	0.4
Fuel supply deferral	1.5	-
Hearing costs	0.5	-
Insurance amortization and proceeds	(0.6)	(0.6)
Non-customer contributions in aid of construction	0.1	-
Phase Two hearing costs	(0.9)	-
	(0.8)	58.2

The following section describes Hydro's regulatory assets and liabilities which will be, or are expected to be, reflected in customer rates in future periods and have been established through the rate setting process. In the absence of rate regulation, these amounts would be reflected in operating results in the year and profit or loss for 2016 would have decreased by \$0.8 million (2015 – an increase of \$58.2 million).

11.2 2014 Cost Deferral

As per Order No. P.U. 58 (2014), Hydro received approval in 2014 to defer \$45.9 million in relation to Hydro's proposed 2014 revenue requirement. Hydro decreased the regulatory asset by \$8.0 million (2015 - \$7.3 million) to recognize an allowance for items outlined in P.U. 49 (2016). In addition, as per Order No. P.U. 49 (2016), the remaining balance of the Fuel Supply Deferral of \$8.1 million was re-classified to the 2014 Cost Deferral with recovery to be dealt with in a future Order.

11.3 2015 Cost Deferral

As per Order No. P.U. 36 (2015), Hydro received approval to defer \$30.2 million in relation to Hydro's proposed 2015 net profit deficiency with recovery subject to a future PUB Order. Pursuant to P.U. 49 (2016), Hydro decreased the regulatory asset by \$1.6 million (2015 - \$27.8 million) to recognize an allowance for adjustments that were outlined in the Order. In addition, based upon P.U. 49 (2016) Hydro re-classified \$0.9 million and \$0.8 million from the 2015 Cost Deferral to Deferred Energy Conservation Costs and PUB Hearing Costs, respectively.

11.4 2016 Cost Deferral

As per Order No. P.U. 56 (2016), Hydro received approval to defer \$38.8 million in relation to Hydro's proposed 2016 net profit deficiency with recovery subject to a future PUB Order. Accordingly, these costs have been recognized as a regulatory asset. In the absence of rate regulation, this amount would be reflected in operating results in the year and profit or loss for 2016 would have decreased by \$38.8 million (2015 - \$nil). Pursuant to P.U. 49 (2016), Hydro decreased the regulatory asset by \$6.4 million to recognize an allowance for adjustments that were outlined in the Order.

NEWFOUNDLAND AND LABRADOR HYDRO
NOTES TO THE NON-CONSOLIDATED FINANCIAL STATEMENTS

11.5 Asset Disposal

As per Board Order No. P.U. 49 (2016), the Board Ordered that Hydro defer \$0.4 million loss on disposal related to the Sunnyside transformer that was disposed in 2014. Hydro is required to recover the deferred asset in rate base and amortize the asset for 22.4 years commencing in 2015. Hydro is required to exclude the new Sunnyside transformer from rate base until the Sunnyside Transformer original asset deferral has been fully amortized. In the absence of rate regulation, this amount would be reflected in the operating results in the year and profit or loss for 2016 would have decreased by \$0.4 million.

11.6 Deferred Energy Conservation

The PUB has historically approved the deferral of costs associated with an electricity conservation program for residential, industrial, and commercial sectors. In 2016, Hydro deferred \$1.1 million (2015 - \$nil) in the Deferred Energy Conservation Costs regulatory asset. In the absence of rate regulation, this amount would be reflected in the operating results in the year and profit or loss for 2016 would have decreased by \$1.1 million (2015 - \$nil). In addition, as per P.U. 49 (2016), Hydro re-classified \$0.9 million of Deferred Energy Conservation Costs from the 2015 Cost Deferral.

11.7 Deferred Foreign Exchange on Fuel

Hydro purchases a significant amount of fuel for HTGS in USD. The RSP allows Hydro to defer variances in fuel prices (including foreign exchange fluctuations). During 2016, Hydro recognized in regulatory assets, foreign exchange gains on fuel purchases of \$0.9 million (2015 - \$0.4 million loss). In the absence of rate regulation, this amount would be reflected in the operating results in the year and profit or loss for 2016 would have increased by \$0.9 million (2015 - decreased by \$0.4 million).

11.8 Deferred Lease Costs

Pursuant to Order No. P.U. 38 (2013), Order No. P.U. 17 (2016) and Order No. P.U. 23 (2016), Hydro deferred lease costs of \$1.6 million (2015 - \$1.4 million) for diesel units and other necessary infrastructure to ensure black start capability at the Holyrood Thermal Generating Station (HTGS). In the absence of rate regulation, this amount would be reflected in the operating results in the year and profit or loss for 2016 would have decreased by \$1.6 million (2015 - \$1.4 million). In Orders No. P.U. 17 (2016), No. P.U. 23 (2016) and No. P.U. 49 (2016) the Board also approved the amortization of the balance over a period of five years. In 2016, Hydro recorded amortization of \$2.2 million (2015 - \$nil) of the deferred lease costs.

11.9 Deferred Purchased Power Savings

In 1997, the PUB ordered Hydro to defer \$1.1 million related to reduced purchased power rates resulting from the interconnection of communities in the area of L'Anse au Clair to Red Bay to the Hydro-Québec system and amortize the balance over a 30 year period. The remaining unamortized savings in the amount of \$0.4 million (2015 - \$0.4 million) are deferred as a regulatory liability.

11.10 Employee Future Benefits Actuarial Loss

Pursuant to Order no. P.U. 36 (2015), Hydro has recognized the amortization of employee future benefit actuarial gains and losses in profit or loss. During 2016, Hydro recorded \$0.2 million (2015 - \$0.4 million) employee future benefits losses as a regulatory adjustment. In the absence of rate regulation, IFRS would require Hydro to include employee future benefits actuarial gains and losses in other comprehensive income. As a result, during 2016 Hydro also recorded a decrease of \$0.2 million (2015 - \$0.4 million) to other comprehensive income to recognize the amount that was reclassified to profit or loss.

11.11 Foreign Exchange Losses

In 2002, the PUB ordered Hydro to defer realized foreign exchange losses related to the issuance of Swiss Franc and Japanese Yen denominated debt and amortize the balance over a 40 year period. Accordingly, these costs were recognized as a regulatory asset. During 2016, the amortization of \$2.2 million (2015 - \$2.2 million) reduced regulatory assets.

NEWFOUNDLAND AND LABRADOR HYDRO

NOTES TO THE NON-CONSOLIDATED FINANCIAL STATEMENTS

11.12 Fuel Supply Deferral

Pursuant to Order No. P.U. 56 (2014), Hydro received approval in 2014 to defer \$9.6 million additional capacity related supply costs incurred during the three months ended March 31, 2014 as a regulatory asset. As per Order's No. P.U. 13 (2016) and P.U. 49 (2016), Hydro recorded a reduction of \$1.5 million in 2016 (2015 – \$nil) based upon the results of a Prudence Review which resulted in a \$1.5 million decrease in profit or loss. In addition, as per Order No. P.U. 49 (2016), the remaining balance of \$8.1 million was re-classified to the 2014 Cost Deferral with recovery to be dealt with in a future Order.

11.13 Hearing Costs

As per Board Order No. P.U. 49 (2016), the Board approved \$0.8 million in Deferred Hearing Costs to be deferred and amortized over a three year period commencing 2015. Pursuant to the Order, Hydro re-classified \$0.8 million from the 2015 Cost Deferral to deferred hearing costs. In 2016, Hydro recorded amortization of \$0.5 million of the deferred hearing costs.

11.14 Insurance Amortization and Proceeds

Pursuant to Order No. P.U. 13 (2012), Hydro records net insurance proceeds against the capital costs and amortizes the balance over the life of the asset. Under IFRS, Hydro is required to recognize the insurance proceeds and corresponding amortization in regulatory liabilities. During 2016, Hydro recorded a decrease to regulatory liabilities resulting from amortization of \$0.6 million (2015 - \$0.6 million) related to the assets.

11.15 Non-Customer Contributions in Aid of Construction

Pursuant to P.U. 1 (2017), Hydro recognized amortization of deferred contributions in aid of construction (CIAC) from entities which are not customers in profit or loss. During 2016, Hydro recorded \$0.1 million (2015 - \$nil) non-customer CIAC amortization as a regulatory adjustment. In the absence of rate regulation, IFRS requires non-customer CIACs to be recorded as contributed capital with no corresponding amortization.

11.16 Phase Two Hearing Costs

In April 2016, Hydro received Order No. P.U. 13 (2016) which approved the deferral of costs for 2014, 2015 and subsequent years relating to Phase Two of the investigation into the reliability and adequacy of power on the Island Interconnected system after the interconnection with the Muskrat Falls generating station. As a result, Hydro recorded a regulatory asset of \$0.9 million. In the absence of rate regulation, this amount would be reflected in the operating results in the year and profit or loss for 2016 would have decreased by \$0.9 million.

11.17 Rate Stabilization Plan (RSP)

In 1986, the PUB ordered Hydro to implement a Rate Stabilization Plan (RSP) which primarily provides for the deferral of fuel expense variances resulting from changes in fuel prices, hydrology and load and associated interest. Additionally, the RSP also includes costs associated with the island interconnected and isolated systems. Adjustments required in utility rates to cover the amortization of the balance are implemented on July 1 of each year. Similar adjustments required in industrial rates are implemented on January 1 of each year.

During 2016, Hydro recorded a net increase in regulatory liabilities of \$19.0 million (2015 - increase of \$78.6 million) resulting in an RSP ending balance for 2016 of \$343.6 million (2015 - \$324.6 million). Included in the balance is \$108.6 million (2015 - \$126.9 million) which is to be refunded in the following year, with the exception of hydraulic variations, which will be refunded at a rate of 25% of the outstanding balance at December 31, 2016. The remaining portion of the RSP balance totaling \$235.0 million (2015 - \$197.7 million) has been set aside with \$143.4 million (2015 - \$133.4 million) to be refunded to Newfoundland Power's retail customers and Hydro's Island Rural Customers, \$91.2 million (2015 - \$61.2 million) subject to a future ruling of the PUB and \$0.4 million (2015 - \$3.1 million) is being used to phase in Island Industrial rate increases.

NEWFOUNDLAND AND LABRADOR HYDRO
NOTES TO THE NON-CONSOLIDATED FINANCIAL STATEMENTS

12. OTHER LONG-TERM ASSETS

<i>As at December 31 (millions of Canadian dollars)</i>		2016	2015
Long-term receivables	(a)	0.5	0.3
Sinking funds	(b)	267.0	242.6
		267.5	242.9
Less: current portion of sinking funds		(75.2)	-
Other long term assets, end of year		192.3	242.9

- (a) The balance of \$0.5 million (2015 - \$0.3 million) includes the non-current portion of receivables associated with customer payment plans and the long-term portion of employee purchase programs.
- (b) As at December 31, 2016, sinking funds include \$267.0 million (2015 - \$242.6 million) related to repayment of Hydro's long-term debt. Sinking fund investments consist of bonds, debentures, promissory notes and coupons issued by, or guaranteed by, the Government of Canada, provincial governments or Schedule 1 banks, and have maturity dates ranging from 2017 to 2033.

Hydro debentures, which are intended to be held to maturity, are deducted from debt while all other sinking fund investments are shown separately on the Non-Consolidated Statement of Financial Position as assets. Annual contributions to the various sinking funds are in accordance with bond indenture terms, and are structured to ensure the availability of adequate funds at the time of expected bond redemption. Effective yields range from 0.97% to 9.12% (2015 - 1.22% to 9.12%).

The sinking funds consist of the following:

<i>As at December 31 (millions of Canadian dollars)</i>	2016	2015
Sinking funds, beginning of year	242.6	228.4
Contributions	8.1	8.1
Earnings	12.5	5.4
Mark-to-market adjustment	3.8	0.7
Sinking funds, end of year	267.0	242.6

Sinking fund instalments due for the next five years are as follows:

<i>(millions of Canadian dollars)</i>	2017	2018	2019	2020	2021
Sinking fund instalments	6.7	6.7	6.7	6.7	6.7

13. INVESTMENTS IN JOINT ARRANGEMENTS

<i>As at December 31 (millions of Canadian dollars)</i>	Ownership Interest	2016	2015
Churchill Falls	65.8%		
Shares, at cost		167.2	167.2
Equity in retained earnings, beginning of year		314.5	283.5
Accumulated other comprehensive income, beginning of year		(3.2)	(6.8)
Other comprehensive income		0.4	3.6
Equity in net income for the year		28.1	31.0
		507.0	478.5

NEWFOUNDLAND AND LABRADOR HYDRO
NOTES TO THE NON-CONSOLIDATED FINANCIAL STATEMENTS

14. TRADE AND OTHER PAYABLES

<i>As at December 31 (millions of Canadian dollars)</i>	2016	2015
Trade payables	99.1	63.0
Accrued interest payable	27.1	28.8
Payables due to related parties	8.8	6.6
Other payables	20.2	15.2
	155.2	113.6

As at December 31, 2016 trade and other payables included balances of \$8.4 million (2015 - \$0.3 million) denominated in USD.

15. DEBT

15.1 Short-term Borrowings

Hydro maintains a \$50.0 million CAD or USD equivalent unsecured demand operating credit facility with its banker and as at December 31, 2016, there were no amounts drawn on this facility (2015 - \$nil), however \$0.3 million of the borrowing limit has been used to issue an irrevocable letter of credit (2015 - \$0.3 million). Borrowings in CAD may take the form of Prime Rate Advances, Bankers' Acceptances (BAs), and letters of credit, with interest calculated at the Prime Rate or prevailing Government BA fee. Borrowings in USD may take the form of Base Rate Advances, London Interbank Offer Rate (LIBOR) Advances and letters of credit. The facility also provides coverage for overdrafts on Hydro's bank accounts, with interest calculated at the Prime Rate. Hydro has issued one irrevocable letter of credit, for \$0.3 million (2015 - \$0.3 million), as a performance guarantee in relation to the Department of Fisheries and Oceans Fish Habitat Compensation Program which was cancelled on January 24, 2017.

On October 12, 2016, Nalcor borrowed \$225.0 million from the Province by way of a promissory note, and these funds were then loaned to Hydro. The proceeds of this loan, will mature on January 11, 2017 and carry an interest rate of 0.90%, were used to repay Hydro's Series AE long-term debentures (Note 33).

In addition, Hydro utilized its government guaranteed promissory note program to fulfill its short-term funding requirements. As at December 31, 2016, there were \$210.0 million in promissory notes outstanding with a maturity date of January 4, 2017 bearing an interest rate of 0.63% (2015 - \$97.0 million bearing an interest rate of 0.66%). Upon maturity, the promissory note was reissued (Note 33).

<i>(millions of Canadian dollars)</i>	2016	2015
Promissory notes - borrowed from the Province	225.0	-
Promissory notes - borrowed from external markets	210.0	97.0
	435.0	97.0

NOTES TO THE NON-CONSOLIDATED FINANCIAL STATEMENTS

15.2 Long-term Debt

The following table represents the value of long-term debt measured at amortized cost:

<i>As at December 31 (millions of Canadian dollars)</i>	Face Value	Coupon Rate %	Year of Issue	Year of Maturity	2016	2015
Hydro						
V*	0.2	10.50	1989	2014	0.2	0.3
X*	150.0	10.25	1992	2017	149.9	149.8
Y*	300.0	8.40	1996	2026	295.0	294.7
AB*	300.0	6.65	2001	2031	305.5	305.7
AD*	125.0	5.70	2003	2033	123.8	123.8
AE	225.0	4.30	2006	2016	-	224.8
AF	200.0	3.60	2014	2045	197.2	197.1
Total debentures	1,300.2				1,071.6	1,296.2
Less: Sinking fund investments in own debentures					57.3	55.8
					1,014.3	1,240.4
Less: payments due within one year					142.6	233.4
Total debentures					871.7	1,007.0

*Sinking funds have been established for these issues.

Hydro's promissory notes and debentures are unsecured and unconditionally guaranteed as to principal and interest and, where applicable, sinking fund payments, by the Province. The Province charges Hydro a guarantee fee of 25 basis points annually on the total debt (net of sinking funds) with a remaining term to maturity of less than 10 years and 50 basis points annually on total debt (net of sinking funds) with a remaining term to maturity greater than 10 years. The fee for the year ended December 31, 2016 was \$4.5 million (2015 - \$4.5 million).

<i>(millions of Canadian dollars)</i>	2017	2018	2019	2020	2021
Long-term debt repayment	150.0	-	-	-	-

16. DEFERRED CONTRIBUTIONS

Hydro has received contributions in aid of construction of property, plant and equipment. These contributions are deferred and amortized to other revenue over the life of the related property, plant and equipment asset.

<i>As at December 31 (millions of Canadian dollars)</i>	2016	2015
Deferred contributions, beginning of year	4.1	3.1
Additions	2.4	1.4
Amortization	(0.7)	(0.4)
Deferred contributions, end of year	5.8	4.1
Less: current portion	(0.6)	(0.6)
	5.2	3.5

17. DECOMMISSIONING LIABILITIES

Hydro has recognized liabilities associated with the retirement of portions of the HTGS and the disposal of Polychlorinated Biphenyls.

NEWFOUNDLAND AND LABRADOR HYDRO
NOTES TO THE NON-CONSOLIDATED FINANCIAL STATEMENTS

The reconciliation of the beginning and ending carrying amounts of decommissioning liabilities for December 31, 2016 and December 31, 2015 are as follows:

<i>As at December 31 (millions of Canadian dollars)</i>	2016	2015
Decommissioning liabilities, beginning of year	28.0	27.2
Liabilities settled	(0.5)	(0.1)
Accretion	0.6	0.7
Revisions	(13.6)	0.2
Decommissioning liabilities, end of year	14.5	28.0

The total estimated undiscounted cash flows required to settle the HTGS obligations at December 31, 2016 are \$15.2 million (2015 - \$32.1 million). The HTGS decommissioning obligation decreased primarily due to an updated assumption that Holyrood will be used as an industrial site for the foreseeable future because of the operation of assets such as the Holyrood CT and the black start diesels. Payments to settle the liability are expected to occur between 2020 and 2023. The fair value of the decommissioning liabilities was determined using the present value of future cash flows discounted at Hydro's credit adjusted risk free rate of 2.5% (2015 - 2.3%). Hydro has recorded \$13.4 million (2015 - \$27.0 million) related to HTGS obligations.

The total estimated undiscounted cash flows required to settle the PCB obligations at December 31, 2016 are \$1.2 million (2015 - \$1.1 million). Payments to settle the liability are expected to occur between 2017 and 2025. The fair value of the decommissioning liabilities was determined using the present value of future cash flows discounted at Hydro's credit adjusted risk free rate of 2.9% (2015 - 2.6%). Hydro has recorded \$1.1 million (2015 - \$1.0 million) related to PCB obligations.

A significant number of Hydro's assets include generation plants, transmission assets and distribution systems. These assets can continue to run indefinitely with ongoing maintenance activities. As it is expected that Hydro's assets will be used for an indefinite period, no removal date can be determined and consequently, a reasonable estimate of the fair value of any related decommissioning liability cannot be determined at this time. If it becomes possible to estimate the fair value of the cost of removing assets that Hydro is required to remove, a decommissioning liability for those assets will be recognized at that time.

18. EMPLOYEE FUTURE BENEFITS

18.1 Pension Plan

Employees participate in the Province's Public Service Pension Plan, a multi-employer defined benefit plan. The employer's contributions for the year ended December 31, 2016 of \$7.4 million (2015 - \$7.6 million) are expensed as incurred.

18.2 Other Benefits

Hydro provides group life insurance and health care benefits on a cost shared basis to retired employees, and in certain cases, their surviving spouses, in addition to a severance payment upon retirement. In 2016, cash payments to beneficiaries for its unfunded other employee future benefits were \$2.5 million (2015 - \$2.4 million). An actuarial valuation was performed as at December 31, 2016.

<i>As at December 31 (millions of Canadian dollars)</i>	2016	2015
Accrued benefit obligation, beginning of year	84.6	83.3
Current service cost	3.4	2.9
Interest cost	3.5	3.5
Benefits paid	(2.5)	(2.4)
Actuarial gain	(2.0)	(2.3)
Transfers	(2.4)	(0.4)
Accrued benefit obligation, end of year	84.6	84.6

NEWFOUNDLAND AND LABRADOR HYDRO
NOTES TO THE NON-CONSOLIDATED FINANCIAL STATEMENTS

When an employee transfers to a related party, the associated accrued benefit obligation is allocated to each respective party based on years of service.

<i>For the year ended (millions of Canadian dollars)</i>	2016	2015
Component of benefit cost		
Current service cost	3.4	2.9
Interest cost	3.5	3.5
Total benefit expense for the year	6.9	6.4

The significant actuarial assumptions used in measuring the accrued benefit obligations and benefit expenses are as follows:

	2016	2015
Discount rate - benefit cost	4.10%	4.20%
Discount rate - accrued benefit obligation	3.90%	4.10%
Rate of compensation increase	3.50%	3.50%

Assumed healthcare trend rates:

	2016	2015
Initial health care expense trend rate	5.85%	6.00%
Cost trend decline to	4.50%	4.50%
Year that rate reaches the rate it is assumed to remain at	2025	2025

A 1% change in assumed health care trend rates would have had the following effects:

<i>Increase (millions of Canadian dollars)</i>	2016	2015
Current service and interest cost	1.4	2.0
Accrued benefit obligation	13.5	18.6
<i>Decrease (millions of Canadian dollars)</i>	2016	2015
Current service and interest cost	(1.0)	(1.4)
Accrued benefit obligation	(10.4)	(14.1)

NEWFOUNDLAND AND LABRADOR HYDRO
NOTES TO THE NON-CONSOLIDATED FINANCIAL STATEMENTS

19. ACCUMULATED OTHER COMPREHENSIVE INCOME

The components of, and changes in, accumulated other comprehensive income (loss) are as follows:

Items that will not be reclassified to profit or loss:

<i>(millions of Canadian dollars)</i>	2016	2015
Investment in joint arrangement		
Balance at January 1, 2016	2.1	(1.5)
Share of other comprehensive income for the year	0.4	3.6
Balance at December 31, 2016	2.5	2.1

Items that may or have been reclassified to profit or loss:

<i>(millions of Canadian dollars)</i>	2016	2015
Available-for-sale financial instruments		
Balance at January 1, 2016	42.4	41.5
Net fair value gains on available-for-sale during the year	13.8	10.9
Amounts reclassified to profit or loss	(10.0)	(10.0)
Balance at December 31, 2016	46.2	42.4

<i>(millions of Canadian dollars)</i>	2016	2015
Employee future benefits		
Balance at January 1, 2016	(24.8)	(27.5)
Regulatory adjustment	0.2	0.4
Net actuarial gains on defined benefit plans	2.0	2.3
Balance at December 31, 2016	(22.6)	(24.8)

20. SHAREHOLDER'S EQUITY

20.1 Share Capital

<i>As at December 31 (millions of Canadian dollars)</i>	2016	2015
Common shares of par value of \$1 each		
Authorized: 25,000,000		
Issued, paid and outstanding: 22,503,942	22.5	22.5

20.2 Contributed Capital

<i>As at December 31 (millions of Canadian dollars)</i>	2016	2015
Contributed capital, beginning of year	129.6	119.5
Additions	14.8	10.1
Contributed capital, end of year	144.4	129.6

During 2016, Lower Churchill Management Corporation contributed \$14.8 million (2015 - \$10.1 million) in additions to property, plant and equipment.

20.3 Dividends

<i>For the year ended December 31 (millions of Canadian dollars)</i>	2016	2015
Declared during the year		
Final dividend for prior year: \$0.05 per share (2015 - \$0.12)	1.1	2.7
Interim dividend for current year: \$0.52 per share (2015 - \$1.87)	11.8	42.0
	12.9	44.7

25. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

25.1 Fair Value

The estimated fair values of financial instruments as at December 31, 2016 and December 31, 2015 are based on relevant market prices and information available at the time. Fair value estimates are based on valuation techniques which are significantly affected by the assumptions used including the amount and timing of future cash flows and discount rates reflecting various degrees of risk. As such, the fair value estimates below are not necessarily indicative of the amounts that Hydro might receive or incur in actual market transactions.

As a significant number of Hydro's assets and liabilities do not meet the definition of a financial instrument, the fair value estimates below do not reflect the fair value of Hydro as a whole.

Establishing Fair Value

Financial instruments recorded at fair value are classified using a fair value hierarchy that reflects the nature of the inputs used in making the measurements. The fair value hierarchy has the following levels:

Level 1 - valuation based on quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2 - valuation techniques based on inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3 - valuation techniques using inputs for the asset or liability that are not based on observable market data (unobservable inputs).

NEWFOUNDLAND AND LABRADOR HYDRO
NOTES TO THE NON-CONSOLIDATED FINANCIAL STATEMENTS

The fair value hierarchy requires the use of observable market inputs whenever such inputs exist. A financial instrument is classified to the lowest level of the hierarchy for which a significant input has been considered in measuring fair value. For assets and liabilities that are recognized at fair value on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by reassessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period. There were no transfers between Level 1, 2 and 3 fair value measurement during the years ended December 31, 2016 and 2015.

	Level	Carrying Value	Fair Value	Carrying Value	Fair Value
		December 31, 2016		December 31, 2015	
<i>(millions of Canadian dollars)</i>					
Financial assets					
Derivative assets	2,3	-	-	1.9	1.9
Sinking funds - investments in same Hydro issue	2	57.3	71.3	55.8	69.9
Sinking funds - other investments	2	267.0	267.0	242.6	242.6
Long-term receivables	2	0.5	0.5	0.3	0.3
Financial liabilities					
Derivative liability	2,3	51.1	51.1	61.2	61.2
Long-term debt including amount due within one year (before sinking funds)	2	1,071.6	1,333.7	1,296.2	1,650.0

The fair value of cash and cash equivalents, trade and other receivables, short-term borrowings, and trade and other payables approximates their carrying values due to their short-term maturity.

The fair values of Level 2 financial instruments are determined using quoted prices in active markets, which in some cases are adjusted for factors specific to the asset or liability. Level 2 derivative instruments are valued based on observable commodity future curves, broker quotes or other publicly available data. Level 2 fair values of other risk management assets and liabilities and long-term debt are determined using observable inputs other than unadjusted quoted prices, such as interest rate yield curves and currency rates.

The following table summarizes quantitative information about the valuation techniques and unobservable inputs used in the fair value measurement of Level 3 financial instruments as at December 31, 2016:

<i>(millions of Canadian dollars)</i>	Carrying Value	Valuation Techniques	Significant Unobservable Input(s)	Range
Derivative liability (PPA)	51.1	Modelled pricing	Volumes (MWh)	35.0-48.0% of available generation

The derivative liability arising under the PPA is designated as a Level 3 instrument as certain forward market prices and related volumes are not readily determinable to estimate a portion of the fair value of the derivative liability. Hence, fair value measurement of this instrument is based upon a combination of internal and external pricing and volume estimates. As at December 31, 2016, the effect of using reasonably possible alternative assumptions for volume inputs to valuation techniques may have resulted in a +\$0.1 million to a +\$6.6 million change in the carrying value of the power purchase derivative liability.

25.2 Risk Management

Hydro is exposed to certain credit, liquidity and market price risks through its operating, investing and financing activities. Financial risk is managed in accordance with a Board approved policy, which outlines the objectives and strategies for the management of financial risk, including the use of derivative contracts. Permitted financial risk management strategies are aimed at minimizing the volatility of Hydro's expected future cash flows.

NEWFOUNDLAND AND LABRADOR HYDRO
NOTES TO THE NON-CONSOLIDATED FINANCIAL STATEMENTS

Credit Risk

Hydro's expected future cash flow is exposed to credit risk through its operating activities, primarily due to the potential for non-performance by its customers, and through its financing and investing activities, based on the risk of non-performance by counterparties to its financial instruments. The degree of exposure to credit risk on cash and cash equivalents and derivative assets as well as from the sale of electricity to customers, including the associated accounts receivable, is determined by the financial capacity and stability of those customers and counterparties. The maximum exposure to credit risk on these financial instruments is represented by their carrying values on the Non-Consolidated Statement of Financial Position at the reporting date.

Credit risk on cash and cash equivalents is minimal, as Hydro's cash deposits are held by a Schedule 1 Canadian Chartered Bank with a rating of A+ (Standard and Poor's).

Credit exposure on Hydro's sinking funds is limited by restricting the holdings to long-term debt instruments issued by the Government of Canada or any province of Canada, Crown corporations and Schedule 1 Canadian Chartered Banks. The following credit risk table provides information on credit exposures according to issuer type and credit rating for the remainder of the sinking fund portfolio:

	Issuer Credit Rating	Fair Value of Portfolio (%)	Issuer Credit Rating	Fair Value of Portfolio (%)
	2016		2015	
Provincial Governments	AA- to AAA	0.41%	AA- to AAA	0.42%
Provincial Governments	A- to A+	43.86%	A- to A+	44.92%
Provincially owned utilities	A- to A+	48.88%	A- to A+	52.05%
Schedule 1 Canadian banks	A- to A+	6.85%	A- to A+	2.61%
		100.00%		100.00%

Credit exposure on derivative assets is limited by the Financial Risk Management Policy, which restricts available counterparties for hedge transactions to Schedule 1 Canadian Chartered Banks, and Federally Chartered US Banks.

Hydro's exposure to credit risk on its energy sales and associated accounts receivable is determined by the credit quality of its customers. Hydro's three largest customers account for 82.7% (2015 - 83.8%) of total energy sales and 62.6% (2015 - 71.8%) of accounts receivable. Energy sales for the three largest customers include \$419.3 million (2015 - \$475.1 million) for Regulated Hydro, as well as \$39.8 million (2015 - \$80.9 million) for Non-Regulated Hydro. These customers are comprised of rate regulated entities or organizations with investment grade credit ratings.

Liquidity Risk

Hydro is exposed to liquidity risk with respect to its contractual obligations and financial liabilities, including any derivative liabilities related to hedging activities. Liquidity risk management is aimed at ensuring cash is available to meet those obligations as they become due.

Short-term liquidity is mainly provided through cash and cash equivalents on hand, funds from operations and a \$300.0 million promissory note program. In addition, Hydro maintains a \$50.0 million (2015 - \$50.0 million) unsecured demand operating facility with its primary banker in order to meet any requirements beyond those forecasted for a given period. Long-term liquidity risk is managed by the issuance of a portfolio of debentures with maturity dates ranging from 2017 to 2045. Sinking funds have been established for these issues, with the exception of the issues maturing in 2045.

NEWFOUNDLAND AND LABRADOR HYDRO
NOTES TO THE NON-CONSOLIDATED FINANCIAL STATEMENTS

The following are the contractual maturities of Hydro's financial liabilities, including principal and interest, as at December 31, 2016:

<i>(millions of dollars)</i>	< 1 Year	1-3 Years	3-5 Years	> 5 Years	Total
Trade and other payables	155.2	-	-	-	155.2
Short-term borrowings	435.0	-	-	-	435.0
Derivative liabilities	51.1	-	-	-	51.1
Long-term debt including sinking funds	156.9	13.3	13.3	891.7	1,075.2
Interest	67.7	119.0	119.0	551.7	857.4
	865.9	132.3	132.3	1,443.4	2,573.9

Market Risk

In the course of carrying out its operating, financing and investing activities, Hydro is exposed to possible market price movements that could impact expected future cash flow and the carrying value of certain financial assets and liabilities. Market price movements to which Hydro has significant exposure include those relating to prevailing interest rates, foreign exchange rates, most notably the USD/CAD, and current commodity prices, most notably the spot prices for diesel fuel, electricity, and No. 6 fuel. These exposures were addressed as part of the Financial Risk Management Policy.

The derivative liability relates to the PPA with Energy Marketing and represents the future value provided to Energy Marketing through the contract. On September 14, 2016, the terms of the PPA were amended. Under the amendment, the PPA can be terminated by either party with notice provided 60 days prior to the intended termination date. At December 31, 2016, Management assessed the impact of the amendment and determined that the amended terms do not result in a change in accounting treatment of the PPA.

Interest Rates

Changes in prevailing interest rates will impact the fair value of financial assets and liabilities classified as held for trading or available-for-sale, which includes Hydro's cash and cash equivalents, and sinking funds. Expected future cash flows associated with those financial instruments can also be impacted. The impact of a 0.5% change in interest rates on the Non-Consolidated Statement of Profit and Comprehensive Income associated with cash and cash equivalents, long-term debt, and short-term borrowings was negligible throughout 2016 due to the short time period to maturity. There was no impact on profit and other comprehensive income associated with long-term debt as all of Hydro's long-term debt has fixed interest rates.

The table below shows the impact of a 0.5% change in interest rates on other comprehensive income associated with the sinking funds as at December 31, 2016:

<i>(millions of dollars)</i>	Other Comprehensive Income	
	0.5% Decrease	0.5% Increase
Interest on sinking funds	8.3	(12.0)

Foreign Currency and Commodity Exposure

Hydro's primary exposure to both foreign exchange and commodity price risk arises from its purchases of No. 6 fuel for consumption at the HTGS, and these risks are mitigated through operation of the RSP. During 2016, there were no electricity sales denominated in USD (2015 - \$33.9 million), as Hydro is no longer exposed to USD denominated electricity sales. Effective October 1, 2015 export sales are recognized in Energy Marketing, in accordance with the PPA.

In 2015, foreign exchange risk on these sales was mitigated through the use of foreign currency forward contracts, which were entered into by Energy Marketing. Commodity price risk was mitigated by Hydro for 2015, through the use of electricity price commodity swaps. During 2016, nil (2015 - \$9.2 million) in realized gains from these derivative contracts were recognized in Hydro's other (income) expense and nil (2015 - \$0.7 million) in unrealized losses were recognized in Hydro's other (income) expense.

NEWFOUNDLAND AND LABRADOR HYDRO
NOTES TO THE NON-CONSOLIDATED FINANCIAL STATEMENTS

The components of the change impacting the carrying value of the derivative asset and derivative liability for the year ended December 31, 2016 are as follows:

<i>(millions of Canadian dollars)</i>	Level II	Level III	Total
Balance at January 1, 2016	1.9	(61.2)	(59.3)
Purchases	-	(51.1)	(51.1)
	1.9	(112.3)	(110.4)
Changes in profit (loss)

Balance at December 31, 2016	-	(51.1)	(51.1)

<i>(millions of Canadian dollars)</i>	Level II	Level III	Total
Balance at January 1, 2015	2.5	-	2.5
Purchases	-	(74.9)	(74.9)
	2.5	(74.9)	(72.4)
Changes in profit (loss)			
Mark-to-market	(0.6)	8.5	7.9
Settlements	-	5.2	5.2
Total	1.9	(61.2)	(59.3)
Balance at December 31, 2015	1.9	(61.2)	(59.3)

26. RELATED PARTY TRANSACTIONS

Hydro enters into various transactions with its parent and other affiliates. These transactions occur in the normal course of operations and are measured at the exchange amount, which is the amount of consideration agreed to by the related parties. Related parties with which Hydro transacts are as follows:

Related Party	Relationship
Nalcor	100.0% shareholder of Hydro
The Province	100.0% shareholder of Nalcor
Churchill Falls	Joint arrangement of Hydro
Twin Falls	Joint venture of Churchill Falls
Labrador-Island Link Limited Partnership	Partnership in which Nalcor owns 75 Class A Units
Energy Marketing	Wholly owned subsidiary of Nalcor
Lower Churchill Management Corporation	Wholly owned subsidiary of Nalcor
Labrador-Island Link Operating Corporation (LIL Opco)	Wholly owned subsidiary of Nalcor
Muskrat Falls Corporation (Muskrat Falls)	Wholly owned subsidiary of Nalcor
Nalcor Energy – Bull Arm Fabrication Inc.	Wholly owned subsidiary of Nalcor
Nalcor Energy – Oil and Gas Inc.	Wholly owned subsidiary of Nalcor
PUB	Agency of the Province

Routine operating transactions with related parties are settled at prevailing market prices under normal trade terms. Outstanding balances due to or from related parties are non-interest bearing with no set terms of repayment, unless otherwise stated.

- (a) Hydro has entered into long-term power contracts with Churchill Falls for the purchase of \$44.5 million (2015 - \$43.6 million) of the power produced by Churchill Falls. In 2015, Hydro entered into an additional power purchase agreement with Churchill Falls, included in the figures above, for the purchase of 225 MW of power.

NEWFOUNDLAND AND LABRADOR HYDRO
NOTES TO THE NON-CONSOLIDATED FINANCIAL STATEMENTS

- (b) Hydro is required to incur the costs of operations of the PUB as well as the cost of hearings and application costs. During 2016, Hydro incurred \$1.3 million (2015 - \$3.9 million) in costs related to the PUB and has included \$2.1 million (2015 - \$4.0 million) in trade and other payables.
- (c) As at December 31, 2016, Hydro has a payable to related parties of \$8.8 million (2015 - \$6.6 million) and a receivable from related parties for \$5.6 million (2015 - \$6.2 million). This payable/receivable consists of various intercompany operating costs and power purchases.
- (d) The debt guarantee fee for 2016 was \$4.5 million (2015 - \$4.5 million). It was paid to the Province on March 31, 2016.
- (e) Hydro recognized contributions in aid of construction totaling \$0.1 million (2015 - \$0.2 million) from the Province related to wind feasibility studies. As at December 31, 2016, \$0.4 million (2015 - \$0.4 million) has been recorded in deferred credits.
- (f) For the year ended December 31, 2016, Hydro recovered \$3.2 million (2015 - \$6.3 million) of operating costs from related parties representing the provision of administrative services.
- (g) For the year ended December 31, 2016, Hydro incurred \$3.3 million (2015 - \$nil) in operating costs from related parties representing the provision of administrative services.
- (h) For the year ended December 31, 2016, Hydro has purchased \$25.2 million (2015 - \$27.8 million) of power generated from assets related to Exploits Generation, which are held by the Province. In addition, Hydro operates these assets on behalf of Nalcor and recovered costs in the amount of \$29.1 million (2015 - \$19.2 million).
- (i) For the year ended December 31, 2016, Hydro has incurred intercompany labour expense of \$2.1 million (2015 - \$1.7 million).
- (j) Hydro received \$0.9 million (2015 - \$0.9 million) from Nalcor associated with the Upper Churchill Redress Agreement to be used to reduce the electricity accounts of each residential Innu customer in Innu Communities or to Mushuau Innu First Nation.
- (k) Hydro recorded \$0.2 million (2015 - \$0.4 million) as a rate subsidy for rural isolated customers from the Province and \$1.8 million (2015 - \$2.0 million) as an energy rebate to offset the cost of basic electricity consumption for Labrador rural isolated residential customers under the Northern Strategic Plan. As at December 31, 2016, there is a balance of \$1.3 million (2015 - \$0.7 million) outstanding in trade and other receivables.
- (l) Hydro recorded \$0.2 million (2015 \$0.4 million) in relation to the isolated diesel subsidy received from the Province for rural customers.
- (m) Hydro received \$1.3 million (2015 \$1.2 million) from other lines of business as a contribution in aid of construction for Information Systems assets.

26.1 Key Management Personnel Compensation

Compensation for key management personnel, which Hydro defines as its executives who have the primary authority and responsibility in planning, directing and controlling the activities of the entity, includes compensation for senior executives. Salaries and employee benefits include base salaries, performance contract payments, vehicle allowances and contributions to employee benefit plans. Post-employment benefits include contributions to the Province's Public Service Pension Plan.

NEWFOUNDLAND AND LABRADOR HYDRO
NOTES TO THE NON-CONSOLIDATED FINANCIAL STATEMENTS

<i>For the year ended December 31 (millions of Canadian dollars)</i>	2016	2015
Salaries and employee benefits	1.2	1.1
Post-employment benefits	0.1	0.1
	1.3	1.2

27. COMMITMENTS AND CONTINGENCIES

- (a) Hydro has received claims instituted by various companies and individuals with respect to power delivery claims and other miscellaneous matters. Although the outcome of such matters cannot be predicted with certainty, Management believes Hydro's exposure to such claims and litigation, to the extent not covered by insurance policies or otherwise provided for, is not expected to materially affect its financial position.
- (b) Outstanding commitments for capital projects total approximately \$144.4 million as at December 31, 2016 (2015 - \$18.8 million).
- (c) Hydro has entered into a number of long-term power purchase agreements as follows:

<u>Type</u>	<u>Rating</u>	<u>Effective Date</u>	<u>Term</u>
Hydroelectric	175 kW	1988	Continual
Hydroelectric	3 MW	1995	25 years
Hydroelectric	4 MW	1998	25 years
Hydroelectric	300 MW	1998	43 years
Cogeneration	15 MW	2003	20 years
Wind	390 kW	2004	15 years
Wind	27 MW	2008	20 years
Wind	27 MW	2009	20 years
Wind	300 kW	2010	Continual
Hydroelectric	225 MW	2015	25.5 years
Hydroelectric	(a)	2015	26 years

(a) Effective October 1, 2015, Hydro entered into a PPA with Energy Marketing which allows for the purchase of available recapture energy from Hydro for resale by Energy Marketing. The PPA can be terminated by either party with notice provided 60 days prior to the intended termination date.

Estimated payments due in each of the next five years are as follows:

<i>(millions of dollars)</i>	2017	2018	2019	2020	2021
Power purchases	74.0	74.8	76.8	78.4	79.6

- (d) Hydro has issued one irrevocable letter of credit to the Department of Fisheries and Oceans in the amount of \$0.3 million as a performance guarantee in relation to the Fish Habitat Compensation Agreement. This has been cancelled subsequent to year end. Please refer to Note 33.

NEWFOUNDLAND AND LABRADOR HYDRO
NOTES TO THE NON-CONSOLIDATED FINANCIAL STATEMENTS

- (e) Through a power purchase agreement signed October 1, 2015, with Nalcor Energy Marketing, Hydro maintains the transmission services contract it entered into with Hydro Québec TransÉnergie which concludes in 2024.

The transmission rental payments for the next five years are estimated to be as follows:

2017	\$20.6 million
2018	\$20.8 million
2019	\$21.0 million
2020	\$21.3 million
2021	\$21.5 million

- (f) In 2013, Hydro entered into a Power Purchase Agreement with Muskrat Falls for the purchase of energy and capacity from the Muskrat Falls Plant. The supply period under the agreement is 50 years and commences at the date of commissioning of the Muskrat Falls plant.
- (g) In 2013, Hydro entered into the Transmission Funding Agreement (TFA) with Labrador-Island Link Operating Corporation (LIL Opco), in which Hydro has committed to make payments which will be sufficient for LIL Opco to recover all costs associated with rent payments under the LIL Lease and payments to cover operating and maintenance costs incurred by LIL Opco. Hydro will be required to begin mandatory payments associated with the TFA upon commissioning of the LIL assets. The term of the TFA is anticipated to continue until the service life of the LIL assets has expired.
- (h) In 2016, Hydro purchased Wabush Mines' rights to the land and assets that comprise the Wabush Terminal Station and a short section of two 230 kV transmission lines that supply this Station. As part of this transaction, Wabush Mines also disclaimed its Crown lease on which another section of 230 kV transmission corridor is located, and Hydro has since applied for a Crown lease for this corridor. All other transmission infrastructure which supplies Labrador West is on land currently subject to a Crown lease to Churchill Falls. Hydro will be filing an application with the PUB for approval of long-term Crown leases and subleases from Churchill Falls for the two 230 kV transmission lines and some terminal equipment serving Labrador West and for the acquisition from Churchill Falls and Twin Falls of some associated terminal station equipment and spares.
- (i) In 2014, Hydro entered into three Capacity Assistance Agreements, one with Vale Newfoundland & Labrador Limited (Vale) and two with Corner Brook Pulp and Paper Limited (CBPP) for the purchase of relief power up to 15.8 MW, 60 MW and 30 MW, respectively, during the winter period. In 2016, Hydro also entered into two new Capacity Assistance Agreements, one with Praxair and a second agreement with Vale for the purchase of relief power up to 5MW and 6MW, respectively. All five agreements have a supply period defined in the agreements as December 1 to March 31 for each contract year, concluding March 2018. Payment for services will be dependent on the successful provision of capacity assistance for the winter period by Vale, CBPP and Praxair.

28. CAPITAL MANAGEMENT

Hydro's principal business requires ongoing access to capital in order to maintain assets to ensure the continued delivery of safe and reliable service to its customers. Therefore, Hydro's primary objective when managing capital is to ensure ready access to capital at a reasonable cost, to minimize its cost of capital within the confines of established risk parameters, and to safeguard Hydro's ability to continue as a going concern.

The capital managed by Hydro is comprised of debt (long-term debentures, promissory notes, bank credit facilities and bank indebtedness) and equity (share capital, shareholder contributions, reserves and retained earnings).

NEWFOUNDLAND AND LABRADOR HYDRO
NOTES TO THE NON-CONSOLIDATED FINANCIAL STATEMENTS

A summary of the capital structure is outlined below:

<i>(millions of dollars)</i>	2016		2015	
Debt				
Sinking funds	(267.0)		(242.6)	
Short-term borrowings	435.0		97.0	
Current portion of long-term debt	142.6		233.4	
Long-term debt	871.7		1,007.0	
	1,182.3	56.8%	1,094.8	56.7%
Equity				
Share capital	22.5		22.5	
Shareholder Contributions	144.4		129.6	
Reserves	26.1		19.7	
Retained earnings	706.5		663.1	
	899.5	43.2%	834.9	43.3%
Total Debt and Equity	2,081.8	100.0%	1,929.7	100.0%

Hydro's approach to capital management encompasses various factors including monitoring the percentage of floating rate debt in the total debt portfolio, the weighted average term to maturity of its overall debt portfolio, its percentage of debt to debt plus equity, and its interest coverage.

For the regulated portion of Hydro's operations, Management targets a capital structure comprised of 75% debt and 25% equity, a ratio which Management believes to be optimal with respect to its cost of capital. This capital structure is maintained by a combination of dividend policy, shareholder contributions and debt issuance. The issuance of any new debt with a term greater than one year requires prior approval of the PUB.

Legislation stipulates that the total of the short-term loans issued by Hydro and outstanding at any time shall not exceed a limit as fixed by the Lieutenant-Governor in Council. Short-term loans are those loans issued with a term not exceeding two years. The current limit is set at \$300.0 million and \$210.0 million is outstanding as at December 31, 2016 (2015 - \$97.0 million). Issuance of short term borrowings and long-term debt by Hydro is further restricted by the Hydro Corporation Act, 2007, as amended. This Act limits Hydro's total government guaranteed borrowings to \$2.1 billion (2015 – \$1.6 billion) at any point in time.

29. SUPPLEMENTARY CASH FLOW INFORMATION

<i>For the year ended December 31 (millions of Canadian dollars)</i>	2016	2015
Trade and other receivables	(12.1)	(5.4)
Inventories	(10.6)	19.9
Prepayments	0.4	0.1
Trade and other payables	41.6	(18.1)
Changes in non-cash working capital balances	19.3	(3.5)
Related to:		
Operating activities	(4.5)	3.9
Investing activities	23.8	(7.4)
	19.3	(3.5)

NEWFOUNDLAND AND LABRADOR HYDRO
NOTES TO THE NON-CONSOLIDATED FINANCIAL STATEMENTS

30. SEGMENT INFORMATION

Hydro operates in three business segments. Hydro regulated activities encompass sales of electricity to customers within the Province, energy marketing activities which include the sale of electricity to markets outside the Province and other non-regulated energy activities which primarily consist of the investments in joint arrangements. The designation of segments has been based on regulatory status and Management accountability. The segments' accounting policies are the same as those previously described in Note 2 of the annual audited non-consolidated financial statements.

	Hydro Regulated	Non-Regulated Activities	Energy Marketing	Total
<i>(millions of Canadian dollars)</i>	For the year ended December 31, 2016			
Energy sales	511.2	-	43.7	554.9
Other revenue	3.8	-	19.2	23.0
Revenue	515.0	-	62.9	577.9

31. PRIOR PERIOD ADJUSTMENTS

The January 1, 2015 and December 31, 2015 figures have been restated as a result of a misstatement relating to the calculation of the other post-employment benefit ('OPEB') health and dental liabilities for retirees. The December 31, 2015 figures have been restated to reduce employee future benefits liability by \$15.2 million and increase opening retained earnings by \$8.7 million and reserves by \$9.1 million.

In addition, January 1, 2015 and December 31, 2015 balances have been restated for contributions received from LCMC that were previously netted. This presentation adjustment has resulted in an increase in property, plant and equipment and contributed capital of \$14.2 million.

The following table summarizes the adjustments to the affected accounts from the previously issued 2015 audited non-consolidated financial statements to the current year comparative figures:

NEWFOUNDLAND AND LABRADOR HYDRO
NOTES TO THE NON-CONSOLIDATED FINANCIAL STATEMENTS

<i>(millions of Canadian dollars)</i>	Previously stated 2015	Adjustment 2015	Restated 2015
Statement of Financial Position			
Property, plant and equipment	1,674.0	14.2	1,688.2
Employee future benefits, ending	(99.8)	15.2	(84.6)
Reserves	(10.6)	(9.1)	(19.7)
Contributed capital	(115.4)	(14.2)	(129.6)
Retained earnings	(654.4)	(8.7)	(663.1)
Statement of Profit and Comprehensive Income			
Operating costs*	179.2	(1.6)	177.6
Regulatory adjustments	59.5	(1.3)	58.2
Profit for the year	43.2	3.2	46.4
Statement of Changes in Equity			
Contributed capital, Balance at January 1, 2015	(115.4)	(4.1)	(119.5)
Employee future benefits reserve, Balance at January 1, 2015	(45.4)	17.9	(27.5)
Retained earnings, Balance at January 1, 2015	(655.9)	(5.5)	(661.4)
Actuarial gain on employee future benefits	11.1	(8.8)	2.3
Regulatory adjustments	1.7	(1.3)	0.4
Statement of Cash Flows

Other	(10.2)	(1.9)	(12.1)

* See Note 32 for additional comparative figures changes

32. COMPARATIVE FIGURES

Certain of the comparative figures have been reclassified to conform to the basis of presentation adopted during the current reporting period. The changes have been summarized as follows:

<i>(millions of Canadian dollars)</i>	Previously Reported	Curtailed Energy Presentation	Operating Costs Presentation	Reclassified Balance
Energy sales	663.9	(0.7)	-	663.2
Power purchased	103.5	(0.7)	-	102.8
Operating costs ¹	177.6	-	(21.5)	156.1
Transmission rental and market fees	-	-	21.5	21.5

¹ See Note 31 for previously reported balance

33. SUBSEQUENT EVENTS

On January 11, 2017 the \$225.0 million promissory note with Nalcor was repaid with a new promissory note, which expires March 31, 2017 and has an interest rate of 0.951%. Hydro intends to refinance this loan in the coming months with a long-term debt issuance in the capital markets.

On January 13, 2017, Hydro re-opened its Series AF debentures and sold \$300.0 million of new debentures to its underwriting syndicate for net proceeds of \$284.0 million.

On January 24, 2017, the irrevocable letter of credit for \$0.3 million, issued as a performance guarantee in relation to the Department of Fisheries and Oceans Fish Habitat Compensation Program, was cancelled by the beneficiary as it was no longer required.
