

# PUBLIC NOTICE:

## Nalcor Energy Vegetation Management Program in Labrador

Nalcor advises it will be commencing its Vegetation Management Program along sections of the Labrador-Island Link (LIL) transmission line right-of-way and access roads. Starting the week of July 13 the following area will be treated:

- 50 km section of the LIL line adjacent to the TLH between the Muskrat Falls gate and St. Paul's access road.

The program will take about three weeks. Signage will be posted in the area following treatment.

Qual-Tech Enterprises Inc. has been contracted to deliver the program. The products to be applied include a combination of the following federally registered and regulated herbicides and surfactants:

- Navius Flex (PCP # 30922)
- Hasten NT (PCP# 28277)

For more information on our Vegetation Management Program for LIL please contact Jason Pond, Vegetation Coordinator, at (709) 737-4246 or [jasonpond@nalcorenergy.com](mailto:jasonpond@nalcorenergy.com), or customer service at 1-888-737-1296.

Additional information may also be obtained by contacting the Department of Municipal Affairs and Environment at (709) 729-2556.

Residents in the vicinity of the treatment areas are asked to contact Nalcor to advise of any wells in the area.
