

PUBLIC NOTICE:

Nalcor Energy Vegetation Management Program in Labrador Complete

Nalcor advises it has completed its Vegetation Management Program along a section of the Labrador-Island Link (LIL) transmission line right-of-way and access roads. The area treated includes:

- 65 km section of the LIL line adjacent to the TLH between the Muskrat Falls gate and St. Paul's access road (structures 63 to 247).

Signage has been posted in the areas treated. The products applied include a combination of the following federally registered and regulated herbicides and surfactants:

- Navius Flex (PCP # 30922)
- Hasten NT (PCP# 28277)

For more information on our Vegetation Management Program for LIL please contact Jason Pond, Vegetation Coordinator, at (709) 737-4246 or jasonpond@nalcorenergy.com, or customer service at 1-888-737-1296.

Additional information may also be obtained by contacting the Department of Municipal Affairs and Environment at **709.729.2556**.
